Armour, 2001 Robert Armour's classic text long cherished by a generation of readers is now complemented with more than 50 new photographs by Egyptologist Edwin Brock and drawings by Elizabeth Rodenbeck that show the gods in their characteristic forms Armour maintains a strong narrative thread with illuminating commentary in his lively retelling of stories from Egyptian mythology including those of the sun god Ra the tragic tale of Isis and Osiris the burlesque of Horus battle with the evil Seth and the gods of the intellect Thoth and Maat Now with an updated bibliography and new appendices this book is sure to inform and enchant a new generation of readers Jacket [Encyclopedia of Mythological Objects](#) Theresa Bane, 2020-06-22 Curious about the chains that bound Fenriswulf in Norse mythology Or the hut of Baba Yaga the infamous witch of Russian folklore Containing more than one thousand detailed entries on the magical and mythical items from the different folklore legends and religions the world over this encyclopedia is the first of its kind From Abadi the named stone in Roman mythology to Zul Hajam one of the four swords said to belong to the prophet Mohammed each item is described in as much detail as the original source material provided including information on its origin who was its wielder and the extent of its magical abilities The text also includes a comprehensive cross reference system and an extensive bibliography to aid researchers [Men's Fitness Magazine's Complete Guide to Health and Well-being](#) Kevin Cobb, 1996 The editors of Men's Fitness magazine and a distinguished 22 member editorial board present the ultimate reference for men seeking to maximize all aspects of their well being physical emotional and psychological Specific ways to maintain good health and prevent disease are stressed in each chapter and numerous sidebars charts and self tests make the information very accessible [The Complete Guide to Modern Dance](#) Don McDonagh, 1976 **Culture, Inculturation, and Theologians** Gerald A. Arbuckle, 2010-09-01 The split between the Gospel and culture is without doubt

the drama of our time wrote Paul VI in 1975 Since that time there has been an increasingly urgent awareness that inculturation is an indispensable task of the church But inculturation the dialogue between church and cultures demands first of all that we who would enter into the dialogue understand what culture itself means and what dialogue entails To that end cultural anthropologist Father Gerald Arbuckle gives us this important volume He traces the history of the development of the concept of culture and the too often negative rarely positive effects of encounters between church and culture He explores how Jesus Christ approached the cultures of his time and outlines the current treatment of culture and inculturation in church documents and in Catholic theology He shows that modest progress in understanding has recently stalled and there are even forces working to turn that progress into regress He concludes with a description of inculturation as it needs to happen and a sharp critique of those who resist With a sense of prophetic hope Arbuckle seeks to help us bridge the lamentable split between Gospel and culture the drama that continues to unfold in our time Encyclopedia of Vampire Mythology Theresa Bane, 2017-02-10 From the earliest days of oral history to the present the vampire myth persists among mankind's deeply rooted fears This encyclopedia with entries ranging from Abchanchu to Zmeus includes nearly 600 different species of historical and mythological vampires fully described and detailed *Fantasy Literature for Children and Young Adults* Ruth Nadelman Lynn, 2005-03-30 Bibliographic information grade level and annotations for nearly 7 500 fantasy books for grades 3-12 are given The introduction discusses the history of fantasy and awards presented to fantasy titles are listed **Who's who in Egyptian Mythology** Anthony S. Mercatante, 1978 *The Exact Sciences in Antiquity* Otto Neugebauer, 1969-01-01 Based on a series of lectures delivered at Cornell University in the fall of 1949 and since revised this is the standard non technical coverage of Egyptian and Babylonian mathematics and astronomy and their transmission to the Hellenistic world Entirely modern in its data and conclusions it reveals the surprising sophistication of certain areas of early science particularly Babylonian mathematics After a discussion of the number systems used in the ancient Near East contrasting the Egyptian method of additive computations with unit fractions and Babylonian place values Dr Neugebauer covers Babylonian tables for numerical computation approximations of the square root of 2 with implications that the Pythagorean Theorem was known more than a thousand years before Pythagoras Pythagorean numbers quadratic equations with two unknowns special cases of logarithms and various other algebraic and geometric cases Babylonian strength in algebraic and numerical work reveals a level of mathematical development in many aspects comparable to the mathematics of the early Renaissance in Europe This is in contrast to the relatively primitive Egyptian mathematics In the realm of astronomy too Dr Neugebauer describes an unexpected sophistication which is interpreted less as the result of millennia of observations as used to be the interpretation than as a competent mathematical apparatus The transmission of this early science and its further development in Hellenistic times is also described An Appendix discusses certain aspects of Greek astronomy and the indebtedness of the Copernican system to Ptolemaic and Islamic methods Dr Neugebauer has long

enjoyed an international reputation as one of the foremost workers in the area of premodern science. Many of his discoveries have revolutionized earlier understandings. In this volume he presents a non technical survey with much material unique on this level which can be read with great profit by all interested in the history of science or history of culture. 14 plates 52 figures

World Literature Decentered Ian Almond, 2021-07-13 What would world literature look like if we stopped referring to the West? Starting with the provocative premise that the West is ten percent of the planet, *World Literature Decentered* is the first book to decenter Eurocentric discourses of global literature and global history not just by deconstructing or historicizing them but by actively providing an alternative. Looking at a series of themes across three literatures: Mexico, Turkey, and Bengal, the book examines hotels, melancholy, orientalism, femicide, and the ghost story in a series of literary traditions outside the West. The non-West, the book argues, is no fringe group or token minority in need of attention; on the contrary, it constitutes the overwhelming majority of this world.

Publisher's blurb.

Classical Myth Barry B. Powell, 1995 Featuring new translations, this volume differs from most texts on classical myth by putting the divine myths and principal legends of the Greeks in the contexts: anthropological, historical, religious, sociological, and economic from which they emerged, including their debt to the Near East. Interspersed are short essays on the later history of the myths and their importance to writers, artists, musicians, and philosophers down to our times. The many illustrations from ancient works of art show how the myths are visualized. The book concludes with a history of later ideas on classical myth, demonstrating their importance for us today. The Inklings Handbook Colin Duriez, David Porter, 2001 The Oxford Inklings was an informal group of literary friends who met weekly from around 1933 to 1963 to talk about ideas, read to each other pieces they were writing, and enjoy a good evening of the cut and parry of prolonged, fierce, and masculine argument. The *Inklings Handbook* focuses on the main members of the group: C. S. Lewis and J. R. R. Tolkien, who are among the most popular writers of the twentieth century; Charles Williams and Owen Barfield. Composed of two sections, this comprehensive guide provides an introduction to the Inklings themselves and an A-Z section of biographical articles as well as the group's publications, themes, and theology. Included is an extensive bibliography and suggestions for further reading. Authoritative and engaging, Duriez and Porter's long-awaited volume makes a fascinating attempt to capture the elusive complexity of the friendships at the heart of this most remarkable association of writers.

Comics to Classics Arthea J. S. Reed, International Reading Association, 1988 Provides an annotated list of recommended books, explains how to get children interested in reading, and includes advice on selecting and buying books.
