**On Aphasia** James Ross,2015-07-27 Excerpt from On Aphasia Being a Contribution to the Subject of the Dissolution of Speech From Cerebral Disease In the following pages is collected with a few alterations and additions a series of papers that appeared during the past year in the Medical Chronicle My main object in writing these papers was to record several interesting and instructive cases of aphasia which had come under my own observation but inasmuch as in none of my cases did the symptoms observed come to the test of a post mortem examination I could not enter profitably either on an analysis of the clinical phenomena or on an interpretation of them in terms of structure without availing myself largely of the labours of others Although previous observations on aphasia will be found described here with tolerable fulness yet at the same time the work does not pretend to be an exhaustive monograph nor is the subject treated in a strictly systematic manner In dealing with the opinions of others I have endeavoured to separate what I conceive to be the true portions of discordant theories from the errors with which they are intermingled and have then striven to combine the true into one harmonious doctrine That I have succeeded in separating the true from all admixture of error and in producing an unimpeachable theory of aphasia I will not for a moment maintain but it would be mere false modesty were I to disclaim all credit for the doctrine set forth in this work or to deny that I believe it to be more harmonious in all its parts than any which has hitherto appeared The authors whose works I have laid under contribution are referred to in the body of the work but I cannot pass over without special mention the names of Broca Troussseau and Charcot in France Kussmaul and Wernicke in Germany Hughlings

Jackson Gairdner Bastian Broadbent and Ferrier in this country These are the great masters of the subject and any one who undertakes to write upon it ought to make a close study of their works It will be observed that the closing part of this volume descends almost to the level of a polemic against Dr Broadbent s views The distinguished author will I hope believe me when I say that this arises not because I attach little but because I attach much importance to his opinions Some portions of Dr Broadbent s work on Aphasia must be simply accepted and not criticised but other portions are open to question He belongs to a school of psychologists which manifests a tendency to break up the human mind into numerous faculties with their corresponding cortical centres and it is as the highest exponent of this school that his views are here singled out for adverse comment About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
