Nonlinear Functional Analysis and Its Applications, Part 1 Felix E. Browder, 1986 *In the Sultan's Salon: Learning, Religion, and Rulership at the Mamluk Court of Qāniṣawh al-Ghawrī (r. 1501-1516)* (2 vols) Christian Mauder, 2021-08-09
Christian Mauder's *In the Sultan's Salon* builds on his award winning research and constitutes the first detailed study of the Egyptian court culture of the Mamluk Sultanate 1250-1517. Based mainly on understudied Arabic manuscript sources describing the learned salons of the Mamluk Sultan al Ghawr, *In the Sultan's Salon* presents the first theoretical conceptualization of the term court that can be fruitfully applied to premodern Islamic societies. It uses this conceptualization to demonstrate that al Ghawr's court functioned as a transregionally interconnected center of dynamic intellectual exchange, theological debate and performance of rule that triggered novel developments in Islamic scholarly, religious and political culture. *Municipal Engineering*, 1902 *Products of Finite Groups* Adolfo Ballester-Bolinches, Ramon Esteban-Romero, Mohamed Asaad, 2010-10-19
The study of finite groups factorised as a product of two or more subgroups has become a subject of great interest during the last years with applications not only in group theory but also in other areas like cryptography and coding theory. It has experienced a big impulse with the introduction of some permutability conditions. The aim of this book is to gather order and examine part of this material including the latest advances made, give some new approach to some topics and present some new subjects of research in the theory of finite factorised groups. Some of the topics covered by this book include groups whose subnormal subgroups are normal, permutable or Sylow permutable products of nilpotent groups and an exhaustive structural study of totally and mutually permutable products of finite groups and their relation with classes of groups. This monograph is mainly addressed to graduate students and senior researchers interested in the study of products and permutability of finite groups. A background in finite group theory and a basic knowledge of representation theory and classes of groups is recommended to follow it. **Algorithms - ESA 2003** Giuseppe Di Battista, Uri Zwick, 2003-10-02
This book constitutes the refereed proceedings of the 11th Annual European Symposium on Algorithms ESA 2003 held in Budapest, Hungary in September 2003. The 66 revised full papers presented were carefully reviewed and selected from 165 submissions. The scope of the papers spans the entire range of algorithmics from design and mathematical analysis issues to real world applications, engineering and experimental analysis of algorithms.
