10 states have legislatively scheduled rate increases that may include one or several increments 2 11 states use a measure of inflation to index the value of the minimum wage to the general change in prices In addition to the 11 states currently using an inflation adjustment four states and DC have chosen a hybrid approach that provides a series of scheduled rate increases followed by inflation indexation for future minimum wage changes Thus a total of 15 states and DC currently or will in a future year index state minimum wage rates to a measure of inflation The remaining 25 states some of which have minimum wage rates above the federal rate do not have an adjustment mechanism in place Because the federal and state minimum wage rates change at various times and in various increments the share of the labor force for which the federal rate is the binding wage floor has changed over time Since 1981 there have been three series of increases in the federal minimum wage rate 1990 1991 1996 1997 and 2007 2009 During that same period there have been numerous changes in state minimum wage policies As a result of those interactions the share of the U S civilian labor force for which the federal minimum wage is the floor has fluctuated but generally declined and is about 39% as of the beginning of 2015
