## **Minorities Cancer:**

*Minorities and Cancer* Lovell A. Jones, 2012-12-06 *Minorities and Cancer* broadly surveys the problem of cancer in minority communities. Leading epidemiologists discuss cancer incidence and mortality in minority populations including black Americans, Hispanics, American Indians, and Asian Americans. Major sections review cancer prevention and detection programs available to the private practice physician and the community research findings on cancer in minority groups and cancer treatment. The final chapters summarize the problem and its possible solutions as perceived by leaders at the American Cancer Society, the National Cancer Institute, the Office of Minority Health Affairs of the Department of Health and Human Services, and Meharry Medical College, a leading minority medical school in the United States. *The Unequal Burden of Cancer* Institute of Medicine, Committee on Cancer Research Among Minorities and the Medically Underserved, 1999-05-11 We know more about cancer prevention, detection, and treatment than ever before, yet not all segments of the U.S. population have benefited to the fullest extent possible from these advances. Some ethnic minorities experience more cancer than the majority population, and poor people, no matter what their ethnicity, often lack access to adequate cancer care. This book provides an authoritative view of cancer as it is experienced by ethnic minorities and the medically underserved. It offers conclusions and recommendations in these areas: Defining and understanding special populations and improving the collection of cancer-related data; Setting appropriate priorities for and increasing the effectiveness of specific National Institutes of Health (NIH) research programs to ensure that special populations are represented in clinical trials; Disseminating research results to health professionals serving these populations with sensitivity to the issues of cancer survivorship. The book provides background data on the nation's struggle against cancer activities and expenditures of the NIH and other relevant topics.
