Minority education and ethnic survival Michael Byram, 1984      **Minority Education and Ethnic Survival** Michael Byram, 1986 This book is a study of the relationship between the education system of a minority and its ethnic identity The study is based on ethnographic fieldwork in one of the minority s schools and focuses particularly on the experience of school leavers      **Methods in Dialectology** Alan R. Thomas, 1988 This book reflects the current concerns of dialectologists as they exploit methodological tools in the twin contexts of insights which derive from sociology via sociolinguistics and their awareness of the interplay between synchronic variation and linguistic change      **Schooling in a Plural Canada** John R. Mallea, 1989 This text adopts a case study approach to the analysis of schooling in a plural society It is divided into two parts the first providing a critical review of relevant theory the second focusing on the application of this theory in the Canadian context      **Ethnicity, Race, and Nationality in Education** N. Ken Shimahara, Ivan Z. Holowinsky, Sandra Tomlinson-Clarke, 2001-07-01 This volume explores contemporary issues of ethnic cultural and national identities and their influence on the social construction of identity These issues are analyzed from the perspective of seven nations China Israel Japan South Africa Ukraine Wales and the United States While different these perspectives are not mutually exclusive lenses through which to review the discourse between ethnic and educational dynamics The chapters in this book illustrate how these seven perspectives differ as well as overlap Part I explores ethnicity and race as important variables in explaining minority students academic performance and schooling in the United States and China Part II focuses on ethnic and racial identity issues in Israel Japan and South Africa Part III addresses ethnic and racial identity as it affects racial integration at different levels of education in post apartheid South Africa and the effects on schooling of a rapidly changing ethnic map in the United States Part IV focuses on issues of language and national identity in three countries Ukraine and Wales where a national language is central to nation building and China where 61 languages are in use and bilingual education is essential in enhancing national literacy and communication The questions this book addresses are highly significant in today s global economy and culture Scholars and professionals in the fields of comparative international and multicultural education and educational policy will find the volume particularly pertinent      *English in Wales* Nikolas Coupland, Alan Richard Thomas, 1990 This sociolinguistic perspective on Wales takes account of both principal languages in contemporary life and in history It traces the conflicts and mutual influences of the two languages in shaping the sociolinguistic character of Wales and traces the way in which it has simultaneously come to function for many Welsh people as a vehicle for cultural continuity the means to an Anglo Welsh identity      **The Ethnic Identities of European Minorities** Brunon Synak, 1995 Contents

and others Focuses on the perspective of the administrator and the teacher Annotation copyright by Book News Inc Portland OR **Resources in Education**, 1997-10 Breaking the Mosaic Jonathan C. Young, 1987 Recent trends in education have emphasized changes in curriculum as a way of attaining cultural equality in Canadian schooling but with thin results Using an analysis grounded in political economy this book contends that cultural inequality is a result of structural factors and discusses new ways of thinking about race ethnicity education and the organization of knowledge **Challenges to European Education** Thyge Winther-Jensen, 1996 Fabricating Europe António Nóvoa, Martin Lawn, 2002-08-31 Fabricating Europe has within it a core idea a crucial but imprecise idea that of a European educational space which transnational governance networks and cultural and economic projects are creating now Yet the perceptible creation of this contemporary space of European policy making and networking has not been a subject of study It appears offstage in studies of national systems in which national and professional identity political organization policy formation and public private markets are all viewed as contained within the borders of the state Fabricating Europe is concerned with the new possibilities to be discerned and imagined in the European public and institutional spaces and discourses in education and the lack of impetus within the broad area of educational studies to meet the task of creating analyses and responses
