Inspector of Mines, **Mining in World History** Martin Lynch,2004-08-02

This book deals with the history of mining and smelting from the Renaissance to the present. Martin Lynch opens with the invention sometime before 1453 of a revolutionary technique for separating silver from copper. It was this invention which brought back to life the rich copper-silver mines of central Europe in the process of making brass cannon and silver coin available to the ambitious Habsburg emperors, thereby underpinning their quest for European domination. Lynch also discusses the Industrial Revolution and the far-reaching changes to mining and smelting brought about by the steam engine, the era of the gold rushes, the massive mineral developments and technological leaps forward which took place in the USA and South Africa at the end of the 19th century, and finally the spread of mass metal production techniques amid the violent struggles of the 20th century. In an engaging, concise and fast-paced text, he presents the interplay of personalities, politics, and technology that have shaped the metallurgical industries over the last 500 years.

State-Business Relations and Economic Transformation in South Africa and Zimbabwe Sinan Baran, 2023-06-12. In *State Business Relations and Economic Transformation in South Africa and Zimbabwe: Unfinished Transformation*, Sinan Baran examines state-business relations (SBRs) in semi-peripheral South Africa and peripheral Zimbabwe after each country's transition to majority rule, to address why SBRs are likely to either consolidate or fracture in post-transition communities. In both countries, the majority governments faced unresolved post-transition divisions relating to race inequality and underdevelopment. Baran analyzes the liberalisation and indigenisation policy choices intended to address these areas that are impacting the mining industries in South Africa and Zimbabwe as case studies. Using comparative analysis and a Modern World Systems lens, he argues that semi-peripheral countries are less susceptible to pressures from domestic and external powers than peripheral countries during periods of economic transformation. He further argues that China's significant political and economic presence in a peripheral country like Zimbabwe has more effect on SBRs than in a semi-peripheral country like South Africa.
