**Derrick Price**

## **Mining Cultures:**

**Mining Cultures** Mary Murphy, 2023-02-03 Butte Montana long deserved its reputation as a wide open town Mining Cultures shows how the fabled Montana city evolved from a male dominated mining enclave to a community in which men and women participated on a more equal basis as leisure patterns changed and consumer culture grew Mary Murphy looks at how women worked and spent their leisure time in a city dominated by the quintessential example of men's work mining Bringing Butte to life she adds in depth research on church weeklies high school yearbooks holiday rituals movie plots and news of local fashion to archival material and interviews A richly illustrated jaunt through western history Mining Cultures is the never told chronicle of how women transformed the richest hill on earth *Mining Cultures of the Battle Mountain Mining District*, 1999

**Coal Cultures** Derrick Price, 2020-08-19 Coal is the commodity that powered the technologies that made the modern world It also brought about unique communities marked by a high degree of social solidarity and self help Mining was central to working class life drawing rural populations into industrial labour but it often took place in picturesque landscapes so that its black spoil heaps became a central symbol of the degradation of pastoral life by the demands of an extractive industry Throughout Europe and the USA photographers have pictured the characteristic landscapes of the industry and continue to do so as strip mining devastates huge areas of land Not only landscape photography but also documentary portraiture photojournalism and art photography have been used in order to portray mines and miners This book presents three interlinked strands of investigation The first is the way in which the production of coal created paradigmatic communities grounded in particular landscapes The second concerns the role of photography in exploring delineating and critiquing mining communities This in turn involves an examination of the aesthetic and social characteristics of a number of genres of photography Lastly it considers the growth and decline of these sites the geographic shift of the industry to other places and the re presentation of traditional localities through the lens of the heritage industry and industrial tourism

**Gray Gold** Mark Chambers, 2023-08-18 Winner of the Clark C Spence Award from the Mining History Association While the histories of gold silver and copper mining and smelting are well studied lead has not received much scholarly attention despite a long history of both Native American and European desire for the ore Over time native peoples made lead ornaments in molds French and American settlers used lead to form musket balls red lead became an important production element for flint and crystal production and white lead was used in making paint until the mid twentieth century Gray Gold aims to broaden understandings of early colonial and Native American history by turning attention to the ways that mining and its scientific technological economic cultural and environmental features shaped intercultural interactions and developments in the New World Backed by remarkable original sources such as

firsthand mining accounts letters and surveys Mark Chambers's study demonstrates how early mining techniques affected the culture clash between Native Americans and Europeans all the while tracking the impact increased mining had on the environment of what would become the states of Illinois and Missouri Chambers traces the evolution of lead mining and smelting technology through pre contact America to the amalgamation of aboriginal processes with French colonial development through Spain's short occupation to the Louisiana Purchase and ultimately the technology transfer from Europe to an efficient and year round standard of practice after American assumption Additionally while slavery in early American industry has been touched on in iron manufacturing and coal mining scholarship the lead mining context sheds new light on the history of that grievous institution Gray Gold adds significantly to the understanding of lead mining and the economic and industrial history of the United States Chambers makes important contributions to the fields of United States history Native American and frontier history mining and environmental history and the history of science and technology **Current**
