Ecologies of Power Pierre Belanger, Alexander Arroyo, 2016-10-21 Countermapping the geospatial footprint of the U S Department of Defense to reveal the making unmaking and remaking of a vast military logistical landscape This book is not about war nor is it a history of war Avoiding the shock and awe of wartime images it explores the contemporary spatial configurations of power camouflaged in the infrastructures environments and scales of military operations Instead of wartime highs this book starts with drawdown lows when demobilization and decommissioning morph into realignment and prepositioning It is in this transitional milieu that the full material magnitudes and geographic entanglements of contemporary militarism are laid bare Through this perpetual cycle of build up and breakdown the U S Department of Defense the single largest developer landowner equipment contractor and energy consumer in the world has engineered a planetary assemblage of operational environments in which militarized demilitarized and non militarized landscapes are increasingly inextricable In a series of critical cartographic essays Pierre Belanger and Alexander Arroyo trace this footprint

far beyond the battlefield countermapping the geographies of U S militarism across five of the most important and embattled operational environments the ocean the atmosphere the highway the city and the desert From the Indian Ocean atoll of Diego Garcia to the defense contractor archipelago around Washington D C from the A01 Highway circling Afghanistan s high altitude steppe to surveillance satellites pinging the planet from low earth orbit and from the vast cold chain conveying military perishables worldwide to the global constellation of military dumps sinks and scrapyards the book unearths the logistical infrastructures and residual landscapes that render strategy spatial militarism material and power operational In so doing B langer and Arroyo reveal unseen ecologies of power at work in the making and unmaking of environments

Imperial Military Geography J. Fitzgerald Lee,1923 *Notes Illustrating the Military Geography of the United States, 1813-1880* Raphael P. Thian,1979-09-01 When the Adjutant General s Office published Raphael Thian s notes on U S military geography in 1880 it produced an invaluable research tool for generations of military historians to come In this single documented reference volume Chief Clerk Thian traced the confusing mutations through which the divisions departments and districts of the Army s command had evolved since 1813 The volume is divided into three parts beginning with the names of the United States Army Continental Commands the date and authority for their creation location of the headquarters geographical changes and discontinuances and other details including the geographical boundaries embracing each division department and district Part II is filled with background information on states and territories and Part III lists the maps contained in The Military Atlas of the United States The Addenda to this edition expand and update Thian s work Notes made by Francis B Heitman to keep his personal copy current are included as is the Memorandum published by the government in 1906 This addition lists all changes from 1898 through 1905
