Military Applications of Modeling ,1982 *Military Applications of Modeling* Francis P. Hoeber,2021-05-30 This book first published in 1981 offers a critical review of the techniques of mathematical modelling and their appropriate application to military operations research the analysis of data historical data exercise and test results and intelligence in preparation for war The virtues of sophistication via simplicity and the beauty of the artful finesse emerge as the signature of successful modelling **The Military Applications of Modeling** ,1984 *Military Operations Research* N.K.

Jaiswal,2012-12-06 Operations Research OR emerged in an effort to improve the effectiveness of newly inducted weapons and equipment during World War II While rapid growth ofOR led to its becoming an important aid to decision making in all sectors including defense its contribution in defense remained largely confined to classified reports Very few books dealing with applications of quantitative decision making techniques in military have been published presumably due to limited availability of relevant information The situation changed rapidly during the last few years The recognition of the subject of Military Operations Research MOR gave tremendous boost to its development Books and journals on MOR started appearing The number of sessions on MOR at national and international conferences also registered an increase The volume of teaching training and research activities in the field of MOR at military schools and non military schools enhanced considerably Military executives and commanders started taking increasing interest in getting scientific answers to questions pertaining to weapon acquisition threat perception and quantification assessment of damage or casualties evaluation of chance of winning a battle force mix deployment and targeting of weapons against enemy targets war games and scenario evaluation Most of these problems were being tackled on the basis of intuition judgment and experience or analysis under very simple assumptions In an increasingly sophisticated and complex defense scenario resulting in advances in equipment and communications the need for supplementing these practices by scientific research in MOR became imperative *Creating Military Power* Risa Brooks,2007-04-09 Creating Military Power examines how societies cultures political structures and the global environment affect countries military organizations Unlike most analyses of countries military power which focus on material and basic resources such as the size of populations technological and industrial base and GNP this volume takes a more expansive view The study's overarching argument is that states global environments and the particularities of their cultures social structures and political institutions often affect how they organize and prepare for war and ultimately impact their effectiveness in battle The creation of military power is only partially dependent on states basic material and human assets Wealth technology and human capital certainly matter for a country's ability to create military power but equally important are the ways a state uses those resources and this often depends on the political and social environment in which military activity takes place Implications of Modern Decision Science for Military Decision-Support Systems Paul K.
