Milking The Moon:

Milking the Moon: A Southerner's Story of Life on the Planet Eugene Walter, 2014-10-06 The author born in Mobile Alabama lived in various locales enjoyed the company of many luminaries had such adventures as a role in Fellini's 8 1/2 and went wherever his fancy and whimsy led him His Cast of characters provides remarkable brief glimpses of such personalities as Djuna Barnes Bricktop Alfred Chester Federico Fellini Josephine Herbst James Laughlin Carson McCullers Gertrude Stein and many many others

Milk Matthew Evans, 2024-07-02 A powerful entertaining and at times eviscerating commentary on the most controversial of original superfoods An entertaining and deeply informative crusade into the human obsession we call milk and a vigorous argument for us to keep drinking it Dan Barber A rich dive into milk and the bounties it offers Dr Norman Swan A revelation Educational relevant and eye opening Nagi Maehashi RecipeTin Eats Unsettling and illuminating Evans at his best Indira Naidoo Milk It's in our coffee on our cereal We see it in processed form yoghurt butter cheese skimmed and lactose free It's there in almond form or made from oats or soy and is as lauded as the perfect food or lambasted as not fit for human consumption and a toxic planet killer depending on who you trust Which type you drink whether you were raised on breastmilk what you think of it is affected by culture biology and fashion How you view it is driven by your gender and your politics as well as your geography The miracle liquid has suffered an image problem It has been used to keep people poor to keep women subjugated and to build corporate and medical careers It's been blamed for climate change the breakdown of human health and an enabler of the industrial revolution From perfect food to pariah milk's role in life has often been debased Milk celebrates the majesty of this noble liquid and delves into the many pretenders to its throne from formula to mylk It looks at the transformation of what a milk producer eats into one of the most nutrient dense foods available and how that can be transformed again into the butter cheese and clotted cream that we know and love today It's an exploration of the science history and politics of what makes mammals different from every other life form on earth
