Borghi, 2012-12-06 PURPOSE OF THE STUDY Primary education in Europe as in the United States and other continents is passing through a period of profound change affecting some of the fundamental educational aims at primary school level and teaching structure content and

methods The purpose of this study is to sketch a broad picture of the European educational scene which may be brought about by the impact of innovation in industrialised countries We are only too aware of the difficulties inherent in our task Even when projections and forecasts are firmly rooted in an analysis of existing data they are liable to be contradicted by the facts We shall attempt to allow for those alternative situations which may provide the context for the organisation and functioning of primary education We make no claim to portray the European primary school at the end of the twentieth or at the beginning of the twenty first century We shall do no more than analyse existing achievements and experiments based on research in the associated fields of education psychology and sociology and from this analysis extrapolate a series of forecasts based on objective factors of a social and intellectual nature offering realistic hypotheses for the future Our aim is to provide sound guidelines for those who are to build a better future for our children
