Islamic Economics Abul Hassan, M.A. Choudhury, 2019-01-10 This book is a comprehensive study which provides informed knowledge within the field of Islamic economics The authors lay down the principal philosophical foundation of a unique and universal theory of Islamic economics by contrasting it with the perspectives of mainstream economics The methodological part of the theory of Islamic economics arises from the ethical foundations of the Qur'an and the Sunnah tradition of the Prophet along with learned exegeses in an epistemological derivation of the postulates and formalism of Islamic economics This foundational methodology will be contrasted with the contemporary approaches of the random use of mainstream economic theory in Islamic economics The book establishes the methodological foundation as the primal and most fundamental premise of the study leading to scientific formalism and the prospect of its application By way of its Islamic epistemological explanation philosophical premise in the form of logical formalism and the use of simple real world examples the authors show the reader that the scientific nature of economics in

general and Islamic economics in particular rests on the conception of the scientific worldview. With its uniquely comparative approach to mainstream economics, this book facilitates a greater understanding of Islamic economic concepts. Senior undergraduate and graduate students will gain exposure to Islamic perspectives of micro and macroeconomics, money, public finance, and development economics. Additionally, this book will be useful to practitioners seeking a greater comprehension of the nature of Islamic economics. It will also enable policymakers to better understand the mechanism of converting institutions such as public and social policy perspectives.

Islamic Financial Economy and Islamic Banking Masudul Alam Choudhury, 2016-06-10. Islamic Financial Economy and Islamic Banking is a thorough, deeply conceptual, analytical, and applied work in the area of epistemological foundation of Islamic world system. The book presents a new frontier of original contribution to the theme of generalized system model of shari'ah. The model derived from the Qur'an and Sunnah Prophetic guidance incorporates a wide analytical coverage of the purpose and objective of the Islamic worldview, maqasid as shari'ah in Islamic economics and finance in particular. The author covers issues that contrast with the existing understanding of Islamic economics and finance, including some specific goals defining the field and how they compare in today's unstable world of financial volatility. A new heterodox thinking in economic theory is outlined. The potential as to how such issues can be addressed by the Tawhidi epistemology in formulating the generalized system model of the purpose and objective of shari'ah lead the way in this book. Its presentation and analysis methods and approach overarch the fields of philosophy of science, rigorous analysis, mathematical, and other presentations of the understanding given and all taken up in the light of the exegesis of the Qur'an and coverage of the Sunnah. The result is a substantive one in the field of scholarship and application and in analytically proving the universality and uniqueness of the epistemic worldview for the academic and practitioner world at large. The totality of the multiverse diversity of issues and problems reviewed comprise the study of the world system by the Tawhidi methodological approach. Yet this methodology and its empirical configuration are universally applicable to all users without any need for unnecessary religious overtone. *Challenge Magazine*, 2009. *The American Economic Review*, 2004. **Choice**, 2005. **The Oxford Encyclopedia of the Modern World** Peter N.
