Mind At Large:

Brief Peeks Beyond Bernardo Kastrup, 2015-05-29 This book is a multi faceted exploration and critique of the human condition as it is presently manifested It addresses science and philosophy explores the underlying nature of reality the state of our society and culture the influence of the mainstream media the nature of free will and a number of other topics Each of these examinations contributes an angle to an emerging idea gestalt that challenges present mainstream views and behaviors and offers a sane alternative The book is organized as a series of short and self contained essays most of which can be read in under one hour

The Palgrave Handbook of Philosophy and Psychoactive Drug Use Rob Lovering, 2024-10-14 In this Handbook philosophers from around the world address the metaphysics epistemology and value of psychoactive mind altering drug use In so doing they attempt to answer questions such as What does the fact of drug induced mind altering experiences tell us about natures of the mind free will and God What does it tell us about what and how we can know Are drug induced mind altering experiences valuable morally aesthetically or otherwise Is the acquisition of drug induced mind altering experiences ever immoral Should the acquisition of drug induced mind altering experiences ever be legally prohibited The Handbook gives an overview of the current research and sets the stage for future directions in philosophical thought relating to psychoactive drug use

Consciousness, the Brain, States of Awareness, and Alternate Realities

Daniel Goleman, Richard J. Davidson, 1979

More Than Allegory Bernardo Kastrup, 2016-04-29 This book is a three part journey into the rabbit hole we call the nature of reality Its ultimate destination is a plausible living validation of transcendence Each of its three parts is like a turn of a spiral exploring recurring ideas through the prisms of religious myth truth and belief respectively With each turn the book seeks to convey a more nuanced and complete understanding of the many facets of transcendence Part I puts forward the controversial notion that many religious myths are actually true and not just allegorically so Part II argues that our own inner storytelling plays a surprising role in creating the seeming concreteness of things and the tangibility of history Part III suggests in the form of a myth how deeply ingrained belief systems create the world we live in The three themes myth truth and belief flow into and interpenetrate each other throughout the book
