Mind Materialism:

A Materialist Theory of the Mind D.M. Armstrong, 2002-09-11 Breaking new ground in the debate about the relation of mind and body David Armstrong's classic text first published in 1968 remains the most compelling and comprehensive statement of the view that the mind is material or physical In the preface to this new edition the author reflects on the book's impact and considers it in the light of subsequent developments He also provides a bibliography of all the key writings to have appeared in the materialist debate

Materialism and the Mind-body Problem David M. Rosenthal, 2000-01-01 Expanded and updated to include a wide range of classic and contemporary works this new edition of David Rosenthal's anthology provides a selection of the most important and influential writings on materialism and the mind body problem

A Materialist Theory of the Mind D. M. Armstrong, 2022-10 A landmark of 20th century philosophy of mind it launched the physicalist revolution in approaches to the mind and has been debated and puzzled over ever since its first publication in 1968 Includes a new Foreword by Peter Anstey placing Armstrong's book in helpful philosophical and historical context

Emergent Materialism Selton Luke Peters, 1995 An introduction to some of the major objections against traditional materialism Topics include the identity of mental and physical events the question of the existence of irreducibly psychic properties the function of consciousness and the problem of personal identity

Consciousness Revisited Michael Tye, 2011-08-19 Four major puzzles of consciousness philosophical materialism must confront after rejecting the phenomenal concept strategy We are material beings in a material world but we are also beings who have experiences and feelings How can these subjective states be just a matter of matter To defend materialism philosophical materialists have formulated what is sometimes called the phenomenal concept strategy which holds that we possess a range of special concepts for classifying the subjective aspects of our experiences In *Consciousness Revisited* the philosopher Michael Tye until now a proponent of the the phenomenal concept strategy argues that the strategy is mistaken A rejection of phenomenal concepts leaves the materialist with the task of finding some other strategy for defending materialism Tye points to four major puzzles of consciousness that arise How is it possible for Mary in the famous thought experiment to make a discovery when she leaves her black and white room In what does the explanatory gap consist and how can it be bridged How can the hard problem of consciousness be solved How are zombies possible Tye presents solutions to these puzzles solutions that relieve the pressure on the materialist created by the failure of the phenomenal concept strategy In doing so he discusses and makes new proposals on a wide range of issues including the nature of perceptual content the conditions necessary for consciousness of a given object the proper understanding of change blindness the nature of phenomenal character and our awareness of it whether we have privileged access to our own experiences and if we do in what such access consists

Consciousness Unbound Edward F. Kelly, Paul Marshall, 2021-03-16 Building on the groundbreaking research of *Irreducible Mind* and *Beyond Physicalism* Edward Kelly and Paul Marshall gather a cohort of leading scholars to consider the significance of

extraordinary experiences for our understanding of reality Currently emerging as a middle ground between warring fundamentalisms of religion and science an expanded science based understanding of nature finally accommodates empirical realities of spiritual sorts while also rejecting rationally untenable overbeliefs The vision sketched here provides an antidote to the prevailing postmodern disenchantment of the world and demeaning of human possibilities It not only more accurately and fully reflects our human condition but engenders hope and encourages ego surpassing forms of human flourishing It offers reasons for us to believe that freedom is real that our human choices matter and that we have barely scratched the surface of our human potentials It also addresses the urgent need for a greater sense of worldwide community and interdependence a sustainable ethos by demonstrating that under the surface we and the world are much more extensively interconnected than previously recognized

Real Materialism Galen Strawson, 2008-05-29 Real Materialism is a collection of highly original essays on a set of related topics in philosophy of mind and metaphysics consciousness and the mind body problem our knowledge of the world the nature of the self or subject free will and moral responsibility the nature of thought and intentionality causation and David Hume

Persons and Minds Joseph Margolis, 2012-12-06 Persons and Minds is an inquiry into the possibilities of materialism Professor Margolis starts his investigation however with a critique of the range of contemporary materialist theories and does not find them viable None of them he argues can accommodate in a convincing way the most distinctive features of the mental life of men and of lower creatures and the imaginative possibilities of discovery and technology p 8 In an extraordinarily rich analysis Margolis carefully considers and criticizes mind body identity theories physicalism eliminative materialism behaviorism as inadequate precisely in that they are reductive He argues then for ramified concepts of emergence and embodiment which will sustain a philosophically coherent account both of the distinctive non natural character of persons and of their being naturally embodied But Margolis provokes us to ask what is an embodied mind The crucial context for him is not the plain physical body as such but culture Persons he writes are in a sense not natural entities they exist only in cultural contexts and are identifiable as such only by reference to their mastery of language and of whatever further abilities presuppose such mastery p 245 The hallmark of persons in Margolis's account is their capacity for freedom as well as their physical endowment Thus he writes their characteristic powers in effect their freedom must inform the order of purely physical causes in a distinctive way p 246

The Mind's Provisions Vincent Descombes, 2021-08-10 Vincent Descombes brings together an astonishingly large body of philosophical and anthropological thought to present a thoroughgoing critique of contemporary cognitivism and to develop a powerful new philosophy of the mind Beginning with a critical examination of American cognitivism and French structuralism Descombes launches a more general critique of all philosophies that view the mind in strictly causal terms and suppose that the brain and not the person thinks Providing a broad historical perspective Descombes draws surprising links between cognitivism and earlier anthropological projects such as Lévi Strauss's work on the symbolic status of myths He identifies as incoherent both the

belief that mental states are detached from the world and the idea that states of mind are brain states these assumptions beg the question of the relation between mind and brain In place of cognitivism Descombes offers an anthropologically based theory of mind that emphasizes the mind's collective nature Drawing on Wittgenstein he maintains that mental acts are properly attributed to the person not the brain and that states of mind far from being detached from the world require a historical and cultural context for their very intelligibility Available in English for the first time this is the most outstanding work of one of France's finest contemporary philosophers It provides a much needed link between the continental and Anglo American traditions and its impact will extend beyond philosophy to anthropology psychology critical theory and French studies

Matter and Mind Mario Bunge, 2010-09-14 This book discusses two of the oldest and hardest problems in both science and philosophy What is matter and What is mind A reason for tackling both problems in a single book is that two of the most influential views in modern philosophy are that the universe is mental idealism and that the everything real is material materialism Most of the thinkers who espouse a materialist view of mind have obsolete ideas about matter whereas those who claim that science supports idealism have not explained how the universe could have existed before humans emerged Besides both groups tend to ignore the other levels of existence chemical biological social and technological If such levels and the concomitant emergence processes are ignored the physicalism spiritualism dilemma remains unsolved whereas if they are included the alleged mysteries are shown to be problems that science is treating successfully

Perception, Mind and Personal Identity David H. Lund, 1994-09-06 The book is primarily a critique of a materialistic view of persons and their experiences Its subject matter is quite broad as it includes a consideration of not only whether there can be an adequate materialist treatment of sensations consciousness and intentionality of thought but also of whether there can be such a treatment of perceptual experience on the one hand and of self consciousness on the other It presents a case for concluding that the difficulties facing the materialist are overwhelming

Armstrong's Materialist Theory of Mind Peter Anstey, David Braddon-Mitchell, 2021-12-15 A Materialist Theory of Mind 1968 by David Armstrong is one of a handful of texts that began the physicalist revolution in the philosophy of mind It is perhaps the most influential book in the field of the second half of the twentieth century In this volume a distinguished international team of philosophers examine what we still owe to Armstrong's theory and how to expand it as well as looking back on how it came about The first four chapters are historical in orientation exploring how the book fits into the history of materialism in the twentieth century The chapters that follow discuss perception belief the supposed explanatory gap between the physical and the mental introspection conation causality and functionalism

Matter and Consciousness Paul M. Churchland, 1988 In Matter and Consciousness Paul Churchland clearly presents the advantages and disadvantages of such difficult issues in philosophy of mind as behaviorism reductive materialism functionalism and eliminative materialism This new edition incorporates the striking developments that have taken place in neuroscience cognitive science and artificial intelligence and notes their expanding relevance to

philosophical issues Churchland organizes and clarifies the new theoretical and experimental results of the natural sciences for a wider philosophical audience observing that this research bears directly on questions concerning the basic elements of cognitive activity and their implementation in real physical systems How is it he asks that living creatures perform some cognitive tasks so swiftly and easily where computers do them only badly or not at all Most significant for philosophy Churchland asserts is the support these results tend to give to the reductive and the eliminative versions of materialism A Bradford Book

A Materialist Theory of the Mind David Malet Armstrong,1993 Breaking new ground in the debate about the relation of mind and body David Armstrong s classic text first published in 1968 remains the most compelling and comprehensive statement of the view that the mind is material or physical In the preface to this new edition the author reflects on the book s impact and considers it in the light of subsequent developments He also provides a bibliography of all the key writings to have appeared in the materialist debate

The Mystery of Mind Peter M.K. Chan,2003 The Mystery of Mind is a systematic and critical introduction to the philosophy of mind At issue is what is known as the mind body problem How does a body support a mind with its brain Pivotal to the book is the author s working out of an adverbial concept of mind that is user friendly to the materialist cause It is upon the strength of this adverbial concept that the author has come to hold that the conceptual gap between the neurobiological and the psych cognitive could in fact be bridged It is also the author s contention that despite shortcomings of other materialist approaches that have been taken in our time an intelligible case for the truth of materialism could still be made in the form of a biological emergent two aspect scenario i e when the adverbial concept of mind he advocates is also brought to bear All in all what The Mystery of Mind offers is a systematic introduction to one of the living philosophical issues that have engaged the human intellects for more than two thousand years This is also the central issue that has motivated research in artificial intelligence cognitive psychology neuroscience and the philosophy of mind in our time

Metaphysics, Materialism and the Evolution of Mind Charles Darwin,1980

Materialism, Minds, and Cartesian Dualism Robert Francis Almeder,2022-03-11 Materialism Minds and Cartesian Dualism offers a history of how philosophers and scientists have thought about mind body problems especially as it concerns the question of consciousness after death This book interrogates the last thirty years of scientific research on reincarnation considering a series of case studies impossible to explain in any other way than persisting consciousness after death Although this book does not attempt to argue why or how some people reincarnate and how long they reincarnate It argues that these case studies demonstrate in compelling ways that some people have indeed to some degree reincarnated Therefore the philosophical materialist position that only physical objects exist is refuted

Why Your Mind Is Not Your Brain P. McGeown,2016-05-25 Since the rise of scientific endeavour through the years of Newton Descartes Bacon and so on to Charles Lyell and Charles Darwin with their ideas of the gradual changes to Earth s surface and animal species from a common ancestor over vast amounts of time there has been the determined throw off of all things non material non objective

non quantifiable non empirical Since Darwin's time the assumption has become hardened that Nature does not produce anything other than what is fundamentally material so does not produce anything that would try to pass itself off as non material Not surprisingly the outcome has been the rise of philosophical and scientific materialism with its emphasis on the methods of classical physics for all of Science and the definition of man as essentially the same as any other physical organism The Mind Brain Identity Theory in particular has pointed out that there could not be a non material consciousness or mind since animals only have brains to work from Man therefore is said to consist of a brain only and not any non material consciousness or mind without values of meaning and purpose of any sort While it looks to be obvious to everyone else that we have a consciousness feelings sensations of red or emotions of love or do things for a purpose or exercise free choices of various kinds the Mind Brain Identity Theorists try to prove that human beings are only biological units randomly thrown up by evolution without any good reason Our children and wives are only biological units automaton fulfilling evolution's trundling path units without love sentiment feelings etc etc Any such mental things are said to be an illusion The implications of a brain only mindless organic computer or robot driven by the laws of physics would be laughable was it not for the academic status of those who perpetuate the thesis Why Your Mind is not Your Brain tells of the other philosophers cardiologists neurosurgeons physicists biologists and so on who show that mind is actually separate from the brain That when the brain dies it does not mean the mind dies Far from being identical with Mind evidence indicates that the brain is a material unit for processing mental phenomena it is an organ for transmitting information that it receives much like a radio or television We don't expect a radio or television show to be identical to the appliance's function nor produced by a network inside it somewhere Mind is non material uses the brain as its organ of expression while at the same time the brain's configuration only allows some information appropriate to physical life and prevents much more from being expressed There is more to Mind than the brain permits We are aware that various kinds of paranormal phenomena rapid healing miracles spontaneous remission Savantism Terminal Lucidity and so on are related to the brain's inhibiting functions being breached on occasions The separation of Mind and Brain allows for the wider nature of a human being to be clearly given as an entity essentially non material

Mind and Cosmos Thomas Nagel, 2012-10-01 The modern materialist approach to life has conspicuously failed to explain such central mind-related features of our world as consciousness intentionality meaning and value This failure to account for something so integral to nature as mind argues philosopher Thomas Nagel is a major problem threatening to unravel the entire naturalistic world picture extending to biology evolutionary theory and cosmology

Mental Reality, second edition, with a new appendix Galen Strawson, 2009-10-09 An argument against neobehaviorism and for naturalized Cartesianism which couples a wholly materialist approach to the mind with a fully realist attitude to the phenomena of conscious experience In Mental Reality Galen Strawson argues that much contemporary philosophy of mind gives undue primacy of place to publicly observable phenomena nonmental phenomena and behavioral

phenomena understood as publicly observable phenomena in its account of the nature of mind. It does so at the expense of the phenomena of conscious experience. Strawson describes an alternative position, naturalized Cartesianism, which couples the materialist view that mind is entirely natural and wholly physical with a fully realist account of the nature of conscious experience. Naturalized Cartesianism is an adductive as opposed to reductive form of materialism. Adductive materialists don't claim that conscious experience is anything less than we ordinarily conceive it to be in being wholly physical. They claim instead that the physical is something more than we ordinarily conceive it to be, given that many of the wholly physical goings on in the brain constitute literally are conscious experiences as we ordinarily conceive them. Since naturalized Cartesianism downgrades the place of reference to nonmental and publicly observable phenomena in an adequate account of mental phenomena, Strawson considers in detail the question of what part such reference still has to play. He argues that it is a mistake to think that all behavioral phenomena are publicly observable phenomena. This revised and expanded edition of *Mental Reality* includes a new appendix which thoroughly revises the account of intentionality given in chapter 7.
