Mind Over Time A World Changing Discovery:

The Human Mind and Belief 3 - Reloaded Eugene G. Breen, 2014-08-21 Mans search for meaning is a perennial quest The workings and desires and hopes and frustrations of the mind tell us many things about it and why it is the way it is The awesome capacity of the entire person to become addicted to almost anything throws a light on our strength and also our weakness The human face is a shadow cast by the mind and more often than not it functions as a one way mirror rather than a true reflection of what is going on beneath the surface We become attached to people and things and we actually love The exhilaration of true joy crafted onto a robust scaffold of pain and disappointment and suffering and sorrow is counter intuitive yet very real Joy in the possession of the beloved is as good as it gets down here but our minds pine for this bliss always This longing for joy is not a vestigial structure in a once functional lobe of our primordial brains that has become atrophied due to disuse It is the flicker of light at the end of our tunnel showing us the way to go The human mind is truly a blueprint of our destiny
