New Paths and Policies towards Conflict Prevention Courtney J. Fung, Björn Gehrmann, Rachel F. Madenyika, Jason G.

Tower, 2021-03-14 This book explores the discourse on conflict prevention and peacebuilding by bringing together researchers from China and Switzerland over a series of policy dialogues. The Charter of the United Nations adopted in the immediate aftermath of World War II is clear about the fundamental necessity for the international community to act in partnership to prevent violent conflict. Given recent shifts in global power dynamics there is an apparent need for international policy issues to be addressed in ways that are inclusive of a wider variety of perspectives and approaches. Chinese policy actors are increasingly interested in fostering their own discourse on issues of prevention and peacebuilding rooted in Chinese experience and engaging with peers from other contexts. The chapters in this volume explore the rationale for conflict prevention and review prevailing academic and practitioner discourses on fundamental questions such as the rationales for why conflicts should be prevented and whether mainstream approaches are still relevant. This book will be of interest to students of peacebuilding, conflict resolution, Chinese politics and International Relations. EU Mediation Law Handbook Nadja Alexander, Sabine Walsh, Martin Svatos, 2017-03-15 Mediation is rapidly becoming a norm in cross border dispute resolution among European Union EU Member States. Accordingly an important question for legal advisers to ask themselves is Which jurisdiction offers the best legal framework to support a potential future mediation of my client's dispute. This book responds to this question by examining the law on mediation in each Member State on a chapter by chapter basis. Each country analysis applies the book's overarching principle of a specially designed Regulatory Robustness Rating System which is thoroughly explained in an introductory chapter. This framework offers a highly effective way to analyse the quality and robustness of each of the EU's twenty nine national jurisdictions legal frameworks relevant to mediation including legislation, case law, practice directions, codes of conduct, standards and other regulatory instruments and factor such an analysis into choices about governing law in mediation.

clauses and other agreements Among the issues and topics covered are the following congruence of domestic and international legal frameworks transparency and clarity of content of mediation laws standards and qualifications for mediators rights and obligations of participants in mediation access to mediation services access to internationally recognised and skilled mediators enforceability of clauses and mediated settlement agreements confidentiality and flexibility admissibility of evidence from mediation in subsequent proceedings impact of commencement of mediation on litigation limitation periods relationship and attitude of courts to mediation and regulatory incentives for legal advisers to engage in mediation This detailed analysis clearly allows users and other regulatory stakeholders to look closely and critically at regulatory regimes for mediation in order to make informed choices and develop appropriate strategies in relation to the law that governs their mediation This is the first book to consider authoritatively what makes good mediation law and what makes a jurisdiction attractive for cross border mediation purposes in terms of its regulatory framework As a resource that identifies potential strengths and weaknesses of each EU Member State's regulatory regime it has no peers and will be welcomed and put to use by the alternative dispute resolution community in Europe and beyond *Comparative Dispute Resolution* Maria F. Moscati, Michael Palmer, Marian Roberts, 2020-12-25 Comparative Dispute Resolution offers an original wide ranging and invaluable corpus of chapters on dispute resolution Enriched by a broad comparative vision and a focus on the processes used to handle disputes this study adds significantly to the discourse around comparative legal studies Chapters present new understandings of theoretical comparative and transnational dimensions of the manner in which societies and their legal systems respond to difficulties in social relations
