Medical Choices Donald V.

Gawronski, 2002-04-09 This book traces the history of medicine, its treatments and its organization to the present day. It explains how the modern practice of medicine became what it is, lists both its successes and its failures, and offers suggestions for its future. *Making Medical Decisions for the Profoundly Mentally Disabled* Norman L. Cantor, 2009-08-21 A legal and moral analysis of medical decision making on behalf of those with such severe cognitive impairments that they cannot exercise self determination. In this book, Norman Cantor analyzes the legal and moral status of people with profound mental disabilities, those with extreme cognitive impairments that prevent their exercise of medical self determination. He proposes a legal and moral framework for surrogate medical decision making on their behalf. The issues Cantor explores will be of interest to professionals in law, medicine, psychology, philosophy, and ethics, as well as to parents, guardians, and health care providers who face perplexing issues in the context of surrogate medical decision making. The profoundly mentally disabled are thought by some moral philosophers to lack the minimum cognitive ability for personhood. Countering this position, Cantor advances both theoretical and practical arguments for according them full legal and moral status. He also argues that the concept of intrinsic human dignity should have an integral role in shaping the bounds of surrogate decision making. Thus, he claims, while profoundly mentally disabled persons are not entitled to make their own medical decisions, respect for intrinsic human dignity dictates their right to have a conscientious surrogate make medical decisions on their behalf. Cantor discusses the criteria that bind such surrogates. He asserts, contrary to popular wisdom, that the best interests of the disabled person are not always the determinative standard; the interests of family or others can sometimes be considered. Surrogates may even be consistent with the intrinsic human dignity standard sometimes authorize tissue donation or participation in

nontherapeutic medical research by profoundly disabled persons. Intrinsic human dignity limits the occasions for such decisions and dictates close attention to the preferences and feelings of the profoundly disabled persons themselves. Cantor also analyzes the underlying philosophical rationale that makes these decision making criteria consistent with law and morals.

Critical Decisions Peter A. Ubel, 2012-09-11
We've all been there sitting uncomfortably in a paper gown as a doctor impassively describes our prognosis. Sometimes it's simple and treatable. Other times we get news we can't fathom and then are faced with decisions that are literally life and death. In this revolutionary book, physician behavioral scientist and bioethicist Peter Ubel M.D. reveals how hidden dynamics in the doctor patient relationship keep us and our loved ones from making the best medical choices. From doctors who struggle to explain to patients who fail to properly listen, countless factors alter the course of our care, causing things to go seriously awry. With riveting stories of Ubel's own experience in the field, his groundbreaking research, and his personal journey walking loved ones through difficult treatment choices, *Critical Decisions* will forever change the way we communicate inside hospitals and medical offices where thoughtful decision making matters the most. Dr. Ubel has been on both ends of the stethoscope and in this book he shows how patients and doctors can learn to become partners and work together to make the right choices. From choosing to get surgery to discussing the side effects of a blood pressure medication, we can finally discover the tools to improve communication, understand the issues, and make confident decisions for our future health and happiness.

Making Medical Choices Jane Stein, Jane J. Stein, 1978
The central theme of this book is that technological advances in medicine have created a multitude of choices for each individual. Choices that can influence how we live and die. These choices are difficult ones and the book provides a better understanding of the issues. Thus the implications of each choice become clearer. Such decisions remain inherently very difficult and personal. Thoughtful compassionate societies must consider these difficult problems. Can we develop mechanisms to assist in the medical choices that will inevitably take place throughout each individual's life? Jane Stein makes a stimulating effort to clarify these subjects in this book. She calls to attention problems we would prefer to avoid, touches the untouchable, and in so doing contributes to a constructive debate on the future of human life.

Preface
Contextuality of Healthcare Choices in Pakistan Saman Nazir, 2024-09-05
Contextuality of Healthcare Choices in Pakistan analyzes the contextual factors shaping healthcare decision making in Pakistan. Divided into three thematic areas—contextuality of healthcare choices, power dynamics, and the health of the marginalized and emerging challenges and healthcare response—the book explores the complex interplay of social, cultural, and institutional influences on health seeking behaviors. The book examines the nuanced fabric of healthcare decision making in Pakistan through a series of nine meticulously crafted chapters. From the influence of geography and social context on health related choices to the power dynamics inherent in patient doctor interactions, each chapter offers valuable insights into the myriad factors shaping individuals' healthcare decisions. Moreover, the book sheds light on overlooked aspects of healthcare decision making, including the experiences of marginalized communities such as the

transgender population and individuals seeking mental healthcare Drawing on diverse theoretical perspectives and empirical evidence this book challenges simplistic notions of healthcare decision making as solely individual and rational Instead it argues for a comprehensive understanding of how communal social and institutional factors intersect to shape health seeking behaviors By illuminating the contextual complexities inherent in healthcare decision making this book offers invaluable insights for researchers policymakers healthcare professionals and the wider public interested in understanding and improving healthcare outcomes in Pakistan
