Factories Anatoli I. Dashchenko,2007-06-08 Dear reader In your hand you have the second book from the series XXI Century Techno gies The first book under the title Manufacturing Technologies for Machines of the Future was published by Springer in 2003 This book is aimed at solving one of the basic problems in the development of modern machine building working out of technologies and manufacturing equipment which would promote the continuous development and improvement of the final product design rapidly adaptable to the requirements of the market as for the quantity quality and variety of products manufactured with the lowest cost and minimum time and labor of the product process In this book the problems of theory and practice of development in the reconfigurable manufacturing systems and transformable factories for various machine building branches with a focus on automotive industry are discussed The problems concerning the development of a new class of production systems which in comparison to the flexible manufacturing systems are composed of a far less quantity of machine tools reduced cost of production are discussed In comparison to the conventional automated lines dedicated systems they make it possible to rapidly transform the equipment for new products manufacturing The book has some advantages concerning the art of scientific ideas and the presentation of developments
