Mapmakers Eye:

The Mapmaker's Eye Jack Nisbet, 2005 Experience the sweep of human and natural history on the Columbia Plateau through the eyes of intrepid explorer and cartographer David Thompson who established two viable trade routes across the Rocky Mountains in Canada systematically surveyed the entire 1 250 mile course of the Columbia River and subsequently distilled his mathematical notations into the first accurate maps of a vast portion of the northwest quadrant of North America

Homelands and Empires Jeffers Lennox, 2017-05-08 The period from 1690 to 1763 was a time of intense territorial competition during which Indigenous peoples remained a dominant force British Nova Scotia and French Acadia were imaginary places that administrators hoped to graft over the ancestral homelands of the Mi kmaq Wulstukwiuk Passamaquoddy and Abenaki peoples *Homelands and Empires* is the inaugural volume in the University of Toronto Press's Studies in Atlantic Canada History In this deeply researched and engagingly argued work Jeffers Lennox reconfigures our general understanding of how Indigenous peoples imperial forces and settlers competed for space in northeastern North America before the British conquest in 1763 Lennox's judicious investigation of official correspondence treaties newspapers and magazines diaries and maps reveals a locally developed system of accommodation that promoted peaceful interactions but enabled violent reprisals when agreements were broken This outstanding contribution to scholarship on early North America questions the nature and practice of imperial expansion in the face of Indigenous territorial strength *The Mapmakers' Legacy* Joan Dawson, 2007 This book is a follow up to Joan Dawson's earlier book *The Mapmaker's Eye* which shows how early maps of Nova Scotia reflect the province's establishment under first French then English colonial rule The present book looks at Nova Scotia's continuing development in the nineteenth century first as a British colony then as a member of Confederation as reflected in the many different types of maps made for various purposes during the century Any map or history enthusiast will be fascinated by Nova Scotia's evolution from a colony of military outposts and subsistence farmers to an increasingly industrial society Early in the nineteenth century maps reflected the settlement that was still taking place the roads being built to link the settlements the increasingly sophisticated defenses that were being constructed and the attempts to identify the resources on which development would depend In the second half of the century maps began to change depicting the development of industries the establishment of railways and shipping lines and the growth of towns where enterprising manufacturers and merchants were setting up businesses Throughout *The Mapmakers Legacy* Dawson examines and explains the many maps that illustrate this evolution This is a unique and captivating account of Nova Scotian cartographic history **The Mapmaker's Apprentice** C.J. Archer, 2016-10-25 USA TODAY BESTSELLER When an apprentice from the Mapmakers Guild goes missing Matt and India are employed to find him Going undercover as a married couple they discover that not everyone at the guild is what they seem and the lad's unearthly maps caused jealousy suspicion and fear With one of the apprentice's magic maps in their possession India and Matt must use their wits and India's fledgling

untried magic to find him But the more they investigate the more sinister plots they uncover including a link between the Mapmakers and Watchmakers Guilds and an ancient magical treasure buried beneath the streets of London As the net of suspicion widens and enemies draw closer it s not just the apprentice s life that s in danger but Matt s too Someone will go to great lengths to prevent him discovering the name of the man who can fix the watch keeping him alive Great lengths indeed

Worldly Consumers Genevieve Carlton,2015-06-22 Though the practical value of maps during the sixteenth century is well documented their personal and cultural importance has been relatively underexamined In Worldly Consumers Genevieve Carlton explores the growing availability of maps to private consumers during the Italian Renaissance and shows how map acquisition and display became central tools for constructing personal identity and impressing one s peers Drawing on a variety of sixteenth century sources including household inventories epigrams dedications catalogs travel books and advice manuals Worldly Consumers studies how individuals displayed different maps in their homes as deliberate acts of self fashioning One citizen decorated with maps of Bruges Holland Flanders and Amsterdam to remind visitors of his military prowess for example while another hung maps of cities where his ancestors fought or governed in homage to his auspicious family history Renaissance Italians turned domestic spaces into a microcosm of larger geographical places to craft cosmopolitan erudite identities for themselves creating a new class of consumers who drew cultural capital from maps of the time

The Island of Seven Cities Paul Chiasson,2013-09-10 The Island of Seven Cities unveils the first tangible proof that the Chinese settled in the New World before Columbus In the summer of 2003 architect Paul Chiasson decided to climb a mountain he had never explored on Cape Breton Island where eight generations of his Acadian family had lived One of the oldest points of exploration and settlement in the Americas with a written history dating back to the first days of European discovery Cape Breton is littered with remnants of old settlements But that day Chiasson found a road that was unique Well made and consistently wide and at one time clearly bordered with stone walls the road had been a major undertaking But he could find no record of it In the two years of detective work that followed Chiasson systematically surveyed the history of Europeans in North America and came to a stunning conclusion the ruins he had stumbled upon an entire townsite on a mountaintop did not belong to the Portuguese the French the English or the Scots And they predated John Cabot s 1497 discovery of the island Using aerial and site photographs maps and drawings and his own expertise as an architect Chiasson re creates how he pieced together the clues to one of the world s great mysteries a large Chinese colony existed and thrived on Canadian shores well before the European Age of Discovery He addresses how the ruins had been previously overlooked or misunderstood and how the colony was abandoned and forgotten in China and in the New World And he discovers the traces the colony left in the storytelling and culture of the Mi kmaq whose written language clothing technical knowledge religious beliefs and legends he argues expose deep cultural ties to China A gripping account of an earth shaking discovery The Island of Seven Cities will change the way we think about our world

A History of the World in 12 Maps Jerry

Brotton,2013-11-14 A New York Times Bestseller Maps allow the armchair traveler to roam the world the diplomat to argue his points the ruler to administer his country the warrior to plan his campaigns and the propagandist to boost his cause rich and beautiful Wall Street Journal Throughout history maps have been fundamental in shaping our view of the world and our place in it But far from being purely scientific objects maps of the world are unavoidably ideological and subjective intimately bound up with the systems of power and authority of particular times and places Mapmakers do not simply represent the world they construct it out of the ideas of their age In this scintillating book Jerry Brotton examines the significance of 12 maps from the almost mystical representations of ancient history to the satellite derived imagery of today He vividly recreates the environments and circumstances in which each of the maps was made showing how each conveys a highly individual view of the world Brotton shows how each of his maps both influenced and reflected contemporary events and how by considering it in all its nuances and omissions we can better understand the world that produced it Although the way we map our surroundings is more precise than ever before Brotton argues that maps today are no more definitive or objective than they have ever been Readers of this beautifully illustrated and masterfully argued book will never look at a map in quite the same way again A fascinating and panoramic new history of the cartographer s art The Guardian The intellectual background to these images is conveyed with beguiling erudition There is nothing more subversive than a map The Spectator A mesmerizing and beautifully illustrated book The Telegraph
