Many Minds:

Bookseller, 1873 Vols for 1871 76 1913 14 include an extra number The Christmas bookseller separately paged and not included in the consecutive numbering of the regular series *The Quantum Mechanics of Minds and Worlds* Jeffrey A. Barrett, 1999-12-09 Jeffrey Barrett presents the most comprehensive study yet of a problem that has puzzled physicists and philosophers since the 1930s The standard theory of quantum mechanics is in one sense the most successful physical theory ever predicting the behaviour of the basic constituents of all physical things no other theory has ever made such accurate empirical predictions However if one tries to understand the theory as providing a complete and accurate framework for the description of the behaviour of all physical interactions it becomes evident that the theory is ambiguous or even logically inconsistent The most notable attempt to formulate the theory so as to deal with this problem the quantum measurement problem was initiated by Hugh Everett III in the 1950s Barrett gives a careful and challenging examination and evaluation of the work of Everett and those who have followed him His informal approach minimizing technicality will make the book accessible and illuminating for philosophers and physicists alike Anyone interested in the interpretation of quantum mechanics should read it Law and the Limits of Reason Adrian Vermeule, 2008-12-23 Human reason is limited Given the scarcity of reason how should the power to make constitutional law be allocated among legislatures courts and the executive and how should legal institutions be designed In *Law and the Limits of Reason* Adrian Vermeule denies the widespread view stemming from Burke and Hayek that the limits of reason counsel in favor of judges making living constitutional law in the style of the common law Instead he proposes and defends a codified constitution a regime in which legislatures have the primary authority to develop constitutional law over time through statutes and constitutional amendments Vermeule contends that precisely because of the limits of human reason large modern legislatures with their numerous and highly diverse memberships and their complex internal structures for processing information are the most epistemically effective lawmaking institutions **Transnational Roots of the Civil Rights Movement** Sean Chabot, 2011-12-16 How did African Americans gain the ability to apply Gandhian nonviolence during the civil rights movement Responses generally focus on Martin Luther King's pilgrimage to nonviolence or favorable social contexts and processes This book in contrast highlights the role of collective learning in the Gandhian repertoire's transnational diffusion Collective learning shaped the invention of the Gandhian repertoire in South Africa and India as well as its transnational diffusion to the United States In the 1920s African Americans and their allies responded to Gandhi's ideas and practices by reproducing stereotypes Meaningful collective learning started with translation of the Gandhian repertoire in the 1930s and small scale experimentation in the early 1940s After surviving the doldrums of the McCarthy era full implementation of the Gandhian repertoire finally occurred during the civil rights movement between 1955 and 1965 This book goes beyond existing scholarship by contributing deeper and finer insights on how transnational diffusion between social movements actually works It highlights the contemporary
