**Rituals and Sisterhoods** Amos Megged,2020-01-17 Rituals and Sisterhoods reveals the previously under studied world of plebeian single women and single female headed households in colonial Mexican urban centers Focusing on the lower echelons of society Amos Megged considers why some commoner women remained single and established their own female headed households examining their unique discourses and self representations from various angles Megged analyzes these women's life stories recorded during the Spanish Inquisition as well as wills and bequests petitions parish records and private letters that describe in their own words how they exercised agency in male dominated and religious spaces Translations of select documents and accompanying analysis illustrate the conditions in which women dissolved their marriages remained in long lasting extramarital cohabitations and formed female led households and sisterhoods of their own Megged provides evidence that single women in colonial Mexico played a far more active and central role in economic systems social organizations cults and political activism than has been previously thought creating spaces for themselves in which they could initiate and maintain autonomy and values distinct from those of elite society The institutionalization of female headed households in mid colonial

Mexico had wide ranging repercussions and effects on general societal values Rituals and Sisterhoods details the particular relevance of these changes to the history of emotions sexuality gender concepts perceptions of marriage life choices and views of honor and shame in colonial society This book will be of significant interest to students and scholars of colonial Latin American history the history of Early Modern Spain and Europe and gender and women s studies **Luis Gordillo** Simón

Ohlbrock,Roland Pawlitschko,2024-04-22 Most of the embodied energy can be saved in the load bearing structure

Conceptual Design of Structures is working at the interface between structural engineering architecture and art The book seeks to answer the complex question of what needs to be considered when conceiving a building structure What influences the process of conceptual thinking How do space and structure interact In what ways do architects and engineers work together The book thus sheds light on the topic of multidisciplinary interrelationships in design showing numerous different perspectives Renowned practitioners and researchers from architecture and engineering share their insights as do artists and historians who cross the disciplinary boundaries Furthermore this book also provides an outlook on possible future developments and aspects of sustainable design and construction Bridging practice academic and research Holistic perspectives through contributors from different disciplines Numerous essays interviews and project reviews provide direct insights Selected works from engineering architecture and art **Luis Gordillo** ,2023 Mathematical Models in

Population Biology and Epidemiology Fred Brauer,Carlos Castillo-Chavez,2011-11-09 The goal of this book is to search for a balance between simple and analyzable models and unsolvable models which are capable of addressing important questions on population biology Part I focusses on single species simple models including those which have been used to predict the growth of human and animal population in the past Single population models are in some sense the building blocks of more realistic models the subject of Part II Their role is fundamental to the study of ecological and demographic processes including the role of population structure and spatial heterogeneity the subject of Part III This book which will include both examples and exercises is of use to practitioners graduate students and scientists working in the field **Embassy of**

to collect sufficient excellent papers without destroying the pioneering spirit of those who first inaugurated the Congress. Getting together to find out what is in progress in the vast region in which Latin languages Portuguese and Spanish are spoken, attracting others to exchange ideas with us and by doing this advancing AI in general is a risky undertaking. This book is the result and it sets a new standard to be discussed by all of us. IBERAMIA was established in 1988 Barcelona by three Ibero-American AI Associations: AEPIA from Spain, SMIA from Mexico and APPA from Portugal after a first meeting in Morelia, Mexico, in 1986 of SMIA and AEPIA.
