**Rheumatoid arthritis: chronic polyarthritides**  
Rheumatoid arthritis is a chronic, systemic disease that primarily affects the joints. It is characterized by a symmetrical pattern of joint involvement, with multiple joints on both sides of the body being affected. The disease can also affect other organs, such as the lungs, heart, and eyes. The exact cause is unknown, but it is believed to be an autoimmune disorder where the body's own immune system attacks the joints.

Joint in the late stage of chronic arthritis. The disease has reached the middle joint of the fingers.

Deformed joint surfaces.

## Arthritic Symptoms

Arthritic symptoms are the earliest signs of an arthritic disease. These symptoms may include pain, stiffness, and swelling in one or more joints. The most common symptom is pain, which can be sharp or dull, and may be accompanied by stiffness and swelling. Other symptoms may include redness, warmth, and tenderness in the affected joints.

Typical disease often begins with stiffness of morning from cold weather exposure. This is followed by the signs of swelling, tenderness or even completely stiffened.

**Joint inflammation in children and adolescents**  
**Juvenile arthritis**  
Juvenile arthritis is a term used to describe joint inflammation in children and adolescents. It can affect one or more joints and may be associated with fever, fatigue, and other systemic symptoms. The disease can be chronic and may require long-term treatment.

**Inflammatory disease of the connective tissue**  
The connective tissue is a type of tissue that provides support and structure to the body. It is found in many different parts of the body, including the joints, skin, and blood vessels. Inflammation of the connective tissue can lead to a variety of symptoms, including pain, stiffness, and swelling. These symptoms may be localized to one area or may affect multiple joints and other parts of the body. The cause of connective tissue disease is not fully understood, but it is believed to be related to an autoimmune disorder.

**Joint inflammation: nondegenerative diseases**  
Joint inflammation can be caused by a variety of nondegenerative diseases. These diseases can affect the joints in different ways, such as by causing pain, stiffness, and swelling. Some common nondegenerative diseases include gout, pseudogout, and rheumatoid arthritis.

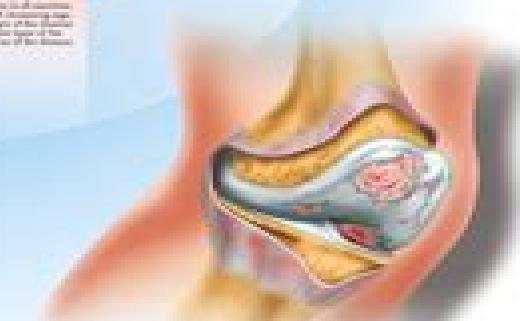

Joint inflammation can affect non-joint structures, such as the ear and foot.

**Spinal disease: nondegenerative conditions**  
Spinal disease can be caused by a variety of nondegenerative conditions. These conditions can affect the spine in different ways, such as by causing pain, stiffness, and swelling. Some common nondegenerative conditions include ankylosing spondylitis, psoriatic arthritis, and rheumatoid arthritis.

Vertebra with spondylitis. The greater of three intervertebral spaces have been removed for exposure to spondylitis.

Knee joint with signs of gout. The damage to the joint capsule of the knee can be clearly seen. The joint space is narrowed and the knee looks stiff.

**Inflammatory joint inflammation**  
Inflammatory joint inflammation is a type of joint inflammation that is caused by an infection. The joints are usually swollen and painful. The cause of the infection can be a variety of things, such as bacteria, viruses, or fungi. The treatment for inflammatory joint inflammation depends on the cause of the infection.

Tokuda, Fumikazu Sakai, Tamiko Takemura, 2018-03-07 This comprehensive text expounds the pathophysiology diagnosis and treatment of lung disease associated with rheumatoid arthritis RA an autoimmune disease that primarily affects joints. Recent advances in therapy for RA provide the benefit of achieving a better outcome in patients with arthritis and a large number of reports on RA are now available. Moreover the American College of Rheumatology and the European League Against Rheumatism have proposed guidelines and recommendations for management of RA patients. Therefore clinicians around the world can adequately understand how to manage patients who have joint symptoms in RA. At the same time however the management of RA patients who have lung problems has not been disseminated sufficiently although lung disease is a common complication in approximately 30-40 % of patients with RA. Unfortunately there has been a lack of tangible evidence regarding the pathophysiology diagnosis and management of lung disease associated with RA. Each expert author in this book elucidates the current status of knowledge about lung disease in RA and the management of RA patients with lung diseases. Thus this valuable collection benefits not only rheumatologists but also respirologists radiologists pathologists general practitioners and medical staff such as nurses who are involved in the management of RA.     *Lung Disease in Rheumatic Disorders* C.
