

# 6 THINGS YOU MAY NOT KNOW ABOUT LYMPHEDEMA

**1** Lymphedema is chronic swelling caused by a build-up of fluid that occurs when the lymphatic system is either faulty or damaged.

Damaged vessels blocking the normal flow of lymphatic fluid

**3** Most physicians in the United States are taught about the lymphatic system for **1 hour** or less during their 4 years of medical school training.

**4** There is **no known cure** for lymphedema, but it can be effectively treated. **Compression therapy** is the most critical component of treatment. Without it, patients are at increased risk for complications and disability.

**5** Medicare, and many private insurance policies do **NOT** cover compression garments, wraps, or bandages — the supplies needed for compression therapy.

**6** The Lymphedema Treatment Act is a bill, currently in Congress, that aims to improve insurance coverage for compression supplies, allowing lymphedema patients to maintain a healthy and productive life.

**2** An estimated 3-5 million Americans suffer from lymphedema — including many that are undiagnosed or undertreated. That is more than ALS, Cystic Fibrosis, Multiple Sclerosis, Muscular Dystrophy, and Parkinson's Disease combined.

2 out of 5 breast cancer patients with lymphedema develop lymphedema within 5 years of surgery!
