Machine A Terreur:

Political Terrorism A.J. Jongman,2017-07-28 While there is no easy way to define terrorism it may generally be viewed as a method of violence in which civilians are targeted with the objective of forcing a perceived enemy into submission by creating fear demoralization and political friction in the population under attack At one time a marginal field of study in the social sciences terrorism is now very much in center stage The 1970s terrorist attacks by the PLO the Provisional Irish Republican Army the Popular Front for the Liberation of Palestine the Japanese Red Army the Unabomber Aum Shinrikyo Timothy McVeigh the World Trade Center attacks the assault on a school in Russia and suicide bombers have all made the term terrorism an all too common part of our vocabulary This edition of Political Terrorism was originally published in the 1980s well before some of the horrific events noted above This monumental collection of definitions conceptual frameworks paradigmatic formulations and bibliographic sources is being reissued in paperback now as a resource for the expanding community of researchers on the subject of terrorism This is a carefully constructed guide to one of the most urgent issues of the world today When the first edition was originally published Choice noted This extremely useful reference tool should be part of any serious social science collection Chronicles of Culture called it a tremendously comprehensive book about a subject that any who have anything to lose from property to liberty life to limbs should be forewarned against **The Plot Machine** Kai Mikkonen,2021-11-01 This book presents a new and exciting theory of the modern French novel by developing the notion of the narrative as a textual machine Many turn of the century French novels thematically identified their means of narration through the various machines that they depicted The narrative devices that were particularly important in this self reflection included the temporal order of the plot the question of a narrative s beginning and end the hierarchy of narrative voices and the techniques of the point of view The question of mechanization became central on all these fronts Has the novel become automated or machine like At the same time the machine metaphors in the novels of Alfred Jarry Emile Zola Jules Verne Villiers de l Isle Adam Raymond Roussel combined the question of the narrative form with new ways to think about man s relationship with technology and the cultural environment The early modernist texts drew upon contradictory notions of technological promise and threat while they also depicted new forms of identity and behavior related to or modeled after machines These texts highlighted cultural assumptions concerning technological innovations and critiqued mainly through parody and through various figures of man machine fusion the positivistic belief in progress Such writers looked for evidence of advanced forms of consciousness arising out of encounters with new technology such as telephones trains bicycles telegraphy phonographs and electricity This volume will be of interest to anyone working in the field of modern French literary and cultural history It will especially appeal to anyone intrigued with the origins of the modernist novel the history of narrative forms and the question of how the experience of new technology may be portrayed in literary texts *MLN.* ,1969 MLN pioneered the introduction of contemporary continental criticism into American scholarship Critical studies in the
