Machine Learning And Statistical Approaches To Image Retrieval:

Machine Learning and Statistical Modeling Approaches to Image Retrieval Yixin Chen, Jia Li, James Z.

Wang, 2004-05-27 In the early 1990s the establishment of the Internet brought forth a revolutionary viewpoint of information storage distribution and processing the World Wide Web is becoming an enormous and expanding distributed digital library Along with the development of the Web image indexing and retrieval have grown into research areas sharing a vision of intelligent agents Far beyond Web searching image indexing and retrieval can potentially be applied to many other areas including biomedicine space science biometric identification digital libraries the military education commerce culture and entertainment Machine Learning and Statistical Modeling Approaches to Image Retrieval describes several approaches of integrating machine learning and statistical modeling into an image retrieval and indexing system that demonstrates promising results The topics of this book reflect authors experiences of machine learning and statistical modeling based image indexing and retrieval This book contains detailed references for further reading and research in this field as well

Fundamentals and Methods of Machine and Deep Learning Pradeep Singh, 2022-02-01 FUNDAMENTALS AND METHODS OF MACHINE AND DEEP LEARNING The book provides a practical approach by explaining the concepts of machine learning and deep learning algorithms evaluation of methodology advances and algorithm demonstrations with applications Over the past two decades the field of machine learning and its subfield deep learning have played a main role in software applications development Also in recent research studies they are regarded as one of the disruptive technologies that will transform our future life business and the global economy The recent explosion of digital data in a wide variety of domains including science engineering Internet of Things biomedical healthcare and many business sectors has declared the era of big data which cannot be analysed by classical statistics but by the more modern robust machine learning and deep learning techniques Since machine learning learns from data rather than by programming hard coded decision rules an attempt is being made to use machine learning to make computers that are able to solve problems like human experts in the field The goal of this book is to present a practical approach by explaining the concepts of machine learning and deep learning algorithms with applications Supervised machine learning algorithms ensemble machine learning algorithms feature selection deep learning techniques and their applications are discussed Also included in the eighteen chapters is unique information which provides a clear understanding of concepts by using algorithms and case studies illustrated with applications of machine learning and deep learning in different domains including disease prediction software defect prediction online television analysis medical image processing etc Each of the chapters briefly described below provides both a chosen approach and its implementation Audience Researchers and engineers in artificial intelligence computer scientists as well as software developers
