**Steina** Natalie Bell,2025-03-11 The first comprehensive monograph in over a decade celebrating the work of pioneering video artist Steina who is known for pushing perspective beyond the human centered realm Accompanying the related exhibition at MIT List Visual Arts Center and Buffalo AKG Art Museum Steina brings renewed recognition to Steina b 1940 Iceland tracing her oeuvre from early collaborative works with her partner Woody Vasulka to her independent explorations of optics and a liberated non anthropocentric subjectivity It follows her practice from downtown New York to Buffalo to the vast landscapes of New Mexico and Iceland which appear in her immersive video environments of the 1990s and 2000s Venturing into nature and combining imaging technologies with reflective orbs Steina reorientated the human body s relationship to nature and expanded how we access the natural world through media Scholars including Gloria Sutton Joey Heinen and Ina Blom consider how Steina s generative sense of play gave way to methods of processing and computation contextualize Steina alongside a group of her peers who shared an obsession with the electronic signal and argue for her interest in video as a proto virtual space Steina has never felt more relevant Steina born Steinunn Briem Bjarnadottir studied violin and music theory in Reykjavik before attending the State Music Conservatory in Prague Czechoslovakia In 1965 she emigrated to New York City By the late 1960s she began to focus entirely on video work and in 1971 cofounded The Electronic Kitchen later The Kitchen an experimental electronic media space Her work has been shown at the Centre Georges Pompidou Paris the Whitney Museum of American Art New York and many other places A copublication with the MIT List Visual Arts Center and Buffalo AKG Art Museum      Video Yvonne Spielmann,2010-08-13 An argument that video is not merely an intermediate stage between analog and digital but a medium in its own right traces the theoretical genealogy of video and examines the different concepts of video seen in works by Vito Acconci Ulrike Rosenbach Steina and Woody Vasulka and others Video is an electronic medium dependent on the transfer of electronic signals Video signals are in constant movement circulating between camera and monitor This process of simultaneous production and reproduction makes video the most reflexive of media distinct from both photography and film in which the image or a sequence of images is central Because it is processual and not bound to recording and the appearance of a frame video shares properties with the computer In this book Yvonne Spielmann argues that video is not merely an intermediate stage between analog and digital but a medium in its own right Video has metamorphosed from technology to medium with a set of aesthetic languages that are specific to it and current critical debates on new media still need to recognize this Spielmann considers video as transformation imagery acknowledging the centrality in video of the transitions between images and the fact that these transitions are explicitly reflected in new processes After situating video in a genealogical model that demonstrates both its continuities and

discontinuities with other media Spielmann considers three strands of video praxis documentary experimental art and experimental image making which is concerned primarily with signal processing She then discusses selected works by such artists as Vito Acconci Ulrike Rosenbach Joan Jonas Nam June Paik Peter Campus Dara Birnbaum Nan Hoover Lynn Hershman Gary Hill Steina and Woody Vasulka Bill Seaman and others These works serve to demonstrate the spectrum of possibilities in video as medium and point to connections with other forms of media Finally Spielmann discusses the potential of interactivity complexity and hybridization in the future of video as a medium *Fractal Narrative* German A.

Duarte,2014-09-15 Fractals suggest recursivity infinity and the repetition of a principle of order They are digital pictures of the universe s continuous movement ignored by mankind during millennia This book investigates the relationship existing between geometries and technology and how it guided cognitive processes and thus the organization of narrative spaces The author proposes a new approach for the study of media remarking that from Bacon s camera obscura to von Neumann s computers both geometries and technology strongly influenced the organization of narrative spaces which acquired a fractal character **Media Scape** Ursula Frohne,1996 Published to accompany exhibition held at the Guggenheim Museum SoHo 14 6 15 9 1996 Camerawork ,1996 *Digital and Video Art* Florence de Mèredieu,2005 Covering many artistic movements that have been developed through the exploitation of modern technology this work is a well informed examination of computer art multimedia installations virtual worlds interactivity Internet art and more **Sculpture** ,1997
