Ed. by D.M. Thompson, 1972 *Evangelicalism and Dissent in Modern England and Wales* David Bebbington, David Ceri Jones, 2020-09-07 This book treads new ground by bringing the Evangelical and Dissenting movements within Christianity into close engagement with one another While Evangelicalism and Dissent both have well established historiographies there are few books that specifically explore the relationship between the two Thus this complex relationship is often overlooked and underemphasised The volume is organised chronologically covering the period from the late seventeenth century to the closing decades of the twentieth century Some chapters deal with specific centuries but others chart developments across the whole period covered by the book Chapters are balanced between those that concentrate on an individual such as George Whitefield or John Stott and those that focus on particular denominational groups like Wesleyan Methodism Congregationalism or the Black Majority Churches The result is a new insight into the cross pollination of these movements that will help the reader to understand modern Christianity in England and Wales more fully Offering a fresh look at the

development of Evangelicalism and Dissent this volume will be of keen interest to any scholar of Religious Studies Church History Theology or modern Britain

The Spoken Word Adam Fox, Daniel Woolf, 2002 Previous studies on oral culture have traditionally emphasized the contradictions between oral and literate culture and focussed on individual countries or regions The essays in this fascinating collection depart from these approaches in several ways By examining not only English but also Scottish and Welsh oral culture they provide the first pan British study of the subject The authors also emphasize the ways in which oral and literate culture continued to compliment and inform each other rather than focusing exclusively on their incompatibility or on the inevitable triumph of the written word

Nonconformity in the Nineteenth Century C.S. Horne, 1907

Nonconformity's Romantic Generation Mark Hopkins, 2007-01-01 This is the first book to attempt a theological portrait of a pivotal generation in the history of the English Free Churches It does so through a dual strategy firstly studying the theological development of key leaders over several decades and secondly capturing the state of the Unions Congregational and Baptist through the freeze frames provided by their biggest denominational controversies in the 1870s and 1880s respectively Archetypal Victorians whose working lives stretched through most of that long reign in the 1860s this generation inherited leadership from a predecessor that had eked out the dying momentum of the Evangelical Revival Bathed in the formidable energy of a newly discovered Romanticism they wrestled strenuously with the fresh challenges it exposed them to while engaged in lengthy ministries in thriving city churches They variously tried rejecting and embracing the liberal transformation of their evangelical heritage or even in the case of R W Dale somehow achieving their synthesis Yet in the end neither he nor C H Spurgeon nor anyone else really found an expression of Christian faith that the next generation could take up and build with and their successors were to preside over the first obvious stages of a long deep and traumatic decline At a time when this period is again being scrutinized for that elusive answer the author will not claim

to have tracked it down there but the conclusion nonetheless indicates that this study surprisingly helped open up vistas much broader than those of the nineteenth century debates The Mid-Victorian Generation, 1846-1886 K. Theodore Hoppen, 1998 This the third volume to appear in the New Oxford History of England covers the period from the repeal of the Corn Laws to the dramatic failure of Gladstone's first Home Rule Bill In his magisterial study of the mid Victorian generation Theo Hoppen identifies three defining themes The first he calls established industrialism the growing acceptance that factory life and manufacturing had come to stay It was during these four decades that the balance of employment shifted irrevocably For the first time in history more people were employed in industry than worked on the land The second concerns the multiple national identities of the constituent parts of the United Kingdom Dr Hoppen's study of the histories of Ireland Scotland Wales and the Empire reveals the existence of a variety of particular and overlapping national traditions flourishing alongside the increasingly influential structure of the unitary state The third defining theme is that of interlocking spheres which the author uses to illuminate the formation of public culture in the period This he argues was generated not by a series of influences operating independently from each other but by a variety of intermeshed political economic scientific literary and artistic developments This original and authoritative book will define these pivotal forty years in British history for the next generation Protestant Nonconformist Texts David Bebbington, 2017 This is a series of four substantial volumes designed to demonstrate the range of interests of the several Protestant Nonconformist traditions from the time of their Separatist harbingers in the sixteenth century to the end of the twentieth century It represents a major project of the Association of Denominational Historical Societies and Cognate Libraries Each volume comprises a General Introduction followed by texts illustrative of such topics as theology philosophy worship and socio political concerns This work has never before been drawn together for publication in this way Prepared by a team of twelve editors all of whom are expert in their areas and drawn from a number of the relevant traditions it will provide a much needed comprehensive view of Nonconformity told largely in the words of those whose story it is The works will prove to be an invaluable resource to scholars students academics and specialist and public libraries as well as to a wider range of church intellectual and general historians This volume gathers and introduces texts relating to English and Welsh Nonconformity Through contemporary writings it provides a vivid insight into the life and thought of the Methodists Congregationalists Baptists Quakers Unitarians and other groups that formed pieces in the diverse mosaic of the nineteenth century chapels Each aspect of Nonconformity has an introductory discussion which includes a guide to the secondary literature on the subject and each passage from a primary source is put in context Provided by publisher
