The book provides a wealth of specific and useful information about the psychological attributes and needs of the most widely used and exhibited nonhuman primates. Readable and well organized, it will be welcomed by animal care and use committees, facilities administrators, enforcement inspectors, animal advocates, researchers, veterinarians, and caretakers. *Naturalistic Behavior of Nonhuman Primates* Clarence Ray Carpenter, 1965. Since 1950 there has been a sharp increase in interest among comparative anatomists, physiologists, biochemists, ecologists, and behavioral scientists in research on non-human primates. Recent advances in the study of genetics, evolution, and human prehistory have focused scientific attention on man's close relatives, the apes and monkeys. At the same time, the value of the naturalistic field study as a research tool and an adjunct to laboratory study has been increasingly recognized. This book brings together for the first time eight classic naturalistic field studies of non-human primates that have long been out of print. Because these pioneer investigations in primatology have been unavailable, contemporary scientists have undertaken research into many naturalistic behavior characteristics originally observed and described by the author in the 1930s and 1940s. His basic monographs on the howler monkeys of Panama, the gibbons of Thailand, the orangutans of Sumatra, and other monkey colonies are included, as well as discussions of the significance of the results of his research for human behavioral adaptations. These important monographs, with new introductions and conclusions by the author, will not only be of extreme interest to psychologists, zoologists, ecologists, anthropologists, and other life scientists, but will also help to advance the scientific productivity of current field investigations.

**Nonhuman Primate Welfare** Lauren M. Robinson, Alexander Weiss, 2023-02-01. This volume reviews the broad topic of welfare in nonhuman primates under human care. Chapters detail the history of primates in captivity, ethical and legal issues surrounding the use of nonhuman primates as entertainment or in research, the different approaches that welfare are measured and how housing enrichment and other conditions can foster or degrade welfare. Since humans began keeping nonhuman primates, we have made vast strides in understanding their cognitive abilities, strong social bonds, vibrant personalities, and their capacity for joy and suffering. With an increasing number of countries banning the use of great apes in biomedical research, the welfare of primates in zoos and research facilities has gained increasing attention. This interdisciplinary work features contributors from many of the fields involved and those on both sides of the issue, thus providing an exhaustive overview of primate welfare. Readers from animal welfare science, primatology, animal testing, veterinary medicine, conservation, ethics, and legislation will find this an important account. *Directions in Modern Theatre and Drama* John Gassner, 1965. *Nursery Care of Nonhuman Primates* G. C. Ruppenthal, 2013-03-09. The Infant Primate Research Laboratory at the University of Washington was conceived in 1970 as a small research unit primarily for support of two individual's interests in early development of nonhuman primates. Because of their research emphasis, a modest nursery was required to support a small population of animals for specific experimental studies. The laboratory experienced rapid growth when others at the University became interested in the use of monkeys as models for early development.

and mental retardation in humans In 1972 the Wlit was formally established as a core facility of the Child Development and Mental Retardation Center and the Regional Primate Research Center This joint administrative and financial support allowed us to invest considerable effort in the development of normative data for rearing animals in our nursery as well as for identifying documenting and rearing subjects at high risk for neonatal death As part of that effort every attempt has been made to promote a multidisciplinary approach to ques tions associated with rearing nonhuman primates This volume includes much of the information thus gathered I feel that such an approach is essential to the promotion of scientific principles in rearing and has allowed the laboratory to contribute to prima tology     **Enrichment for Nonhuman Primates ,2005**

International Perspectives National Research Council,Institute for Laboratory Animal Research,International Perspectives: The Future of Nonhuman Primate Resources Program Committee,2003-08-29 The future of nonhuman primate NHP resources is a concern of scientists veterinarians and funding authorities An April 2002 workshop brought participants from all over the world to discuss various aspects of the issue such as current shortfalls and excesses in NHP breeding and exportation programs the status of breeding and conservation programs internationally the development of specific pathogen free colonies difficulties in transporting NHP and challenges in the management of NHP colonies
