(Received 28 July 1999; Revised 6 January 2000)

In this paper we prove the existence theorems for the integrodifferential equation

$$\begin{aligned}y'(t) &= f\left(t, y(t), \int_0^t k(t, s, y(s)) \, ds\right), \quad t \in I = [0, T], \\y(0) &= y_0,\end{aligned}$$

where in first part f , k , y are functions with values in a Banach space E and the integral is taken in the sense of Bochner. In second part f , k are weakly–weakly sequentially continuous functions and the integral is the Pettis integral. Additionally, the functions f and k satisfy some boundary conditions and conditions expressed in terms of measure of noncompactness or measure of weak noncompactness.
