Nonlinear Eigenvalues And Analytic Hypoellipticity:

Nonlinear Eigenvalues and Analytic-Hypoellipticity Ching-Chau Yu, 1998 Explores the failure of analytic hypoellipticity of two partial differential operators The operators are sums of squares of real analytic vector fields and satisfy Hormander's condition By reducing to an ordinary differential operator the author shows the existence of non linear eigenvalues which is used to disprove analytic hypoellipticity of the original operators No index Annotation copyrighted by Book News Inc Portland OR *Semiclassical Analysis of a Nonlinear Eigenvalue Problem and Analytic Hypoellipticity* Bernard Helffer, Didier Robert, Xue Ping Wang, 2003 Geometric Complex Analysis - Proceedings Of The Third International Research Institute Of Mathematical Society Of Japan J Noguchi, Hirotaka Fujimoto, J Kajiwara, Takeo Ohsawa, 1996-05-09 This proceedings is a collection of articles in several complex variables with emphasis on geometric methods and results which includes several survey papers reviewing the development of the topics in these decades Through this volume one can see an active field providing insight into other fields like algebraic geometry dynamical systems and partial differential equations
