GUIDELINES

Non-Timber Forest Products Guidelines

SUMMARY

Non-Timber Forest Products (NTFPs) play a crucial role in supporting the livelihoods of local communities while promoting sustainable resource management. When integrated into an ERS-certified project, the exploitation of NTFPs must be carefully managed to ensure that ecological restoration objectives are not compromised.

These guidelines aim to provide detailed instructions to local communities on how to responsibly exploit NTFPs within the context of an ecosystem restoration project, minimizing harm to the restoration area. Any NFTP-related interventions in the Social Additionality Plan must adhere to these guidelines.

Nontimber Forest Products Management on National Forests in the United States Rebecca Jean McLain, 2005

This study provides an overview of nontimber forest products (NTFP) programs on national forests in the United States. We conducted an email survey in 2003 to obtain data on NTFP management activities on national forests across the country. Program characteristics examined in the study included important NTFPs managed on national forests, presence of NTFP coordinators and law enforcement programs on ranger districts, incorporation of NTFPs into forest planning documents, presence of NTFP inventory and monitoring programs, managers' views on barriers to and opportunities for including NTFP harvesters in NTFP inventory and monitoring efforts, and managers' perceptions of barriers to expanding commercial NTFP harvesting. The data indicate that the agency is constructing a foundation for scientific NTFP management. The study identifies lack of funding and internal administrative capacity as key barriers to adequate incorporation of NTFPs in Forest Service planning, inventory, and monitoring.

Sustainable Management of Non-Timber Forest Products. The Role of a Market Price Information System Rana Bahadur Rawal, 2020-10-15 Doctoral Thesis Dissertation from the year 2019 in the subject Forestry. Forestry Economics language English abstract. The study aims to identify the role of market price information system in distribution of non-timber forest products (NTFPs) among the usufructs and sustainable management of NTFPs in long run. Information of market and price of NTFPs is important for usufructs to protect the forest and timely cultivate and harvest the non-timber forest product. The study has explored the knowledge and accessibility of usufructs on MPIS of NTFPs, current practice of MPIS, effectiveness of MPIS, challenges and opportunity of equitable distribution of NTFPs among usufructs. The study was based on the cross-sectional descriptive and exploratory research design. Data was collected from 466 respondents of Dolpa, Salyan, and Banke districts of Nepal. Mixed method was adopted to collect the data. Simple random sampling technique was used to select the respondents. Structured questionnaire survey and semi-structured interviews were done to collect the quantitative and qualitative data. Statistical models like cross-tabulation, Chi-Square test, and ANOVA were used for data analysis.

Ecological Sustainability for Non-timber Forest Products Charlie M. Shackleton, Ashok K. Pandey, Tamara Ticktin, 2015-03-24 There is growing knowledge about and appreciation of the importance of Non-timber Forest Products (NTFPs) to rural livelihoods in developing countries and to a lesser extent developed countries. However, there is also an assumption on the part of policy makers that any harvesting of wild animal or plant products from the forests and other natural and modified ecosystems must be detrimental to the long-term viability of target populations and species. This book challenges this idea and shows that while examples of such negative impacts

certainly exist there are also many examples of sustainable harvesting systems for NTFPs The chapters review and present coherent and scientifically sound information and case studies on the ecologically sustainable use of NTFPs They also outline a general interdisciplinary approach for assessing the sustainability of NTFP harvesting systems at different scales A wide range of case studies is included from Africa Asia and South America using plant and animal products for food crafts textiles medicines and cosmetics

Non-timber Forest Products Guido Broekhoven,1996 *Nontimber Forest Products in the United States* Eric T. Jones,Rebecca Jean McLain,James F. Weigand,2002 A quiet revolution is taking place in America s forests Once seen primarily as stands of timber our woodlands are now prized as a rich source of a wide range of commodities from wild mushrooms and maple sugar to hundreds of medicinal plants whose uses have only begun to be fully realized Now as timber harvesting becomes more mechanized and requires less labor the image of the lumberjack is being replaced by that of the forager This book provides the first comprehensive examination of nontimber forest products NTFPs in the United States illustrating their diverse importance describing the people who harvest them and outlining the steps that are being taken to ensure access to them As the first extensive national overview of NTFP policy and management specific to the United States it brings together research from numerous disciplines and analytical perspectives such as economics mycology history

ecology law entomology forestry geography and anthropology in order to provide a cohesive picture of the current and potential role of NTFPs. The contributors review the state of scientific knowledge of NTFPs by offering a survey of commercial and noncommercial products an overview of uses and users and discussions of sustainable management issues associated with ecology cultural traditions forest policy and commerce. They examine some of the major social economic and biological benefits of NTFPs while also addressing the potential negative consequences of NTFP harvesting on forest ecosystems and on NTFP species populations. Within this wealth of information are rich accounts of NTFP use drawn from all parts of the American landscape from the Pacific Northwest to the Caribbean. From honey production to a review of nontimber forest economies still active in the United States such as the Ojibway harvest of plants recounted here the book takes in the whole breadth of recent NTFP issues including ecological concerns associated with the expansion of NTFP markets and NTFP tenure issues on federally managed lands. No other volume offers such a comprehensive overview of NTFPs in North America. By examining all aspects of these products it contributes to the development of more sophisticated policy and management frameworks for not only ensuring their ongoing use but also protecting the future of our forests.
