NVLD and Developmental Visual-Spatial Disorder in Children Jessica Broitman, Miranda Melcher, Amy Margolis, John M. Davis, 2020-10-17 This unique volume explores issues related to working with children who have nonverbal learning disability NVLD. It examines how a child's psychology thoughts, feelings, beliefs, and affects his or her functioning and learning. In addition, the book addresses how a child's experiences are processed through individual personality, psychology, culture, environment, and economic circumstances and family dynamics. Using these psychological organizing principles, the book describes how to work most effectively with young patients with NVLD. It offers a new model and definition for understanding NVLD, emphasizing its core deficit of visual spatial processing. In addition, this book addresses efforts to rename NVLD to developmental visual spatial disorder (DVSD). It describes the 11 possible subtypes as including a primary deficit in visual spatial processes and impairment in several additional functional domains, including executive functioning, social emotional deficits, academic achievement, and motor coordination. The book highlights the need for psychologically minded treatment and provides specific intervention guidelines. It details how to conduct the intake process and create a treatment plan and team and offers practical suggestions for working with a patient's family members. In addition, the book addresses the importance of working with a consistent psychological theory such as control mastery theory (CMT). It describes the Brooklyn Learning Center Model for treating NVLD and offers guidelines for interventions to support patients academically. The book provides a comprehensive approach to the neuropsychological assessment of NVLD as well as examples of visual spatial sensory perception, executive functioning, academics, social emotional deficits, and motor coordination interventions and all forms used to gather information from patients. Key areas of coverage include: Definition of nonverbal learning disability NVLD, Efforts toward inclusion in the Diagnostic and Statistical Manual (DSM), and for renaming it to a developmental visual spatial disorder (DVSD). Guide to general diagnostic testing and assessment, Developing a treatment plan and team for NVLD patients, NVLD therapy and tutoring priorities. NVLD and Developmental Visual Spatial Disorder in Children is an essential reference for clinicians, therapists, and other professionals as well as researchers, professors, and graduate students in school and clinical child psychology, special education, speech language therapy, developmental psychology, pediatrics, social work, as well as all interrelated disciplines.

Nonverbal Learning

Disabilities at School Pamela B. Tanguay,2002 **Pediatric Neurology Part I** Joanne Volden,2013-04-24 Nonverbal learning disability NLD is described as a subtype of specific learning disability where the source of the disability is a difficulty in processing nonverbal information The child with NLD presents with problems in visual spatial and tactile perception but with strengths in rote verbal skills Traditionally these children were recognized by their difficulties in arithmetic which presented a stark contrast with their strengths in spelling and decoding text They also exhibited a split between their verbal IQ VIQ and performance IQ PIQ scores with the VIQ being significantly higher than PIQ Over time however diagnostic criteria have evolved and the broadened definition of the NLD syndrome has led many to question the

utility and uniqueness of the NLD diagnosis In addition shifting diagnostic standards have made research results difficult to replicate In short the research to date leaves many unanswered questions about 1 the definition of the NLD syndrome 2 the pervasiveness of the academic social and psychopathological difficulties 3 the source of the NLD syndrome and 4 the degree to which it overlaps with other conditions This chapter outlines a brief history of the NLD syndrome how it is currently conceptualized and some of the current debate about the unanswered questions above **Learning Disabilities** Nirbhay N. Singh,Ivan L. Beale,2012-12-06 It is important to reaffirm the reality of the learning disabilities LD phenomenon as a condition that imposes genuine constraints on a student's ability to function and not as some chimerical entity defined by an ever changing political situation Perceptual memory attention linguistic social cognitive and neuropsychological factors are an integral part of LD By mapping out in great detail and with much new data the acquired knowledge on learning disabilities both empirical and theoretical this book unravels many mysteries This book is a landmark in learning disabilities studies and it lays down solid foundations for future research and practical intervention in the field
