The last great work of the age of reason the final instance when all human knowledge could be presented with a single point of view. Unabashed optimism and unabashed racism pervades many entries in the 11th and provide its defining characteristics. Despite its occasional ugliness the reputation of the 11th persists today because of the staggering depth of knowledge contained with its volumes. It is especially strong in its biographical entries. These delve deeply into the history of men and women prominent in their eras who have since been largely forgotten except by the historians scholars. *Multifunctional Rural Land Management* Floor Brouwer, 2012 The increasing demand for rural land and its natural resources is creating competition and conflicts. Many interested parties including farmers nature conservationists rural residents and tourists compete for the same space. Especially in densely populated areas agriculture recreation urban and suburban growth and infrastructure development exert a constant pressure on rural areas. Because land is a finite resource spatial policies which are formulated and implemented to increase the area allocated to one use imply a decrease in land available for other uses. As a result at many locations multi purpose land use is becoming increasingly important. This notion of multi purpose land use is reflected in the term multifunctionality. This volume provides insights into viable strategies of sustainable management practices allowing multiple functions sustained by agriculture and natural resources in rural areas. It shows how the rural economy and policies can balance and cope with these competing demands and includes numerous case studies from Europe North America and developing countries
