Older Adults In Psychotherapy:

Psychotherapy with Older Adults Bob G. Knight, 2004-02-20 This Third Edition of the bestselling Psychotherapy with Older Adults continues to offer students and professionals a thorough overview of psychotherapy with older adults. Using the contextual cohort based maturity specific challenge CCMSC model it draws upon findings from scientific gerontology and life span developmental psychology to describe how psychotherapy needs to be adapted for work with older adults as well as when it is similar to therapeutic work with younger adults. Sensitively linking both research and experience author Bob G Knight provides a practical account of the knowledge technique and skills necessary to work with older adults in a therapeutic relationship. This volume considers the essentials of gerontology as well as the nature of therapy in depth focusing on special content areas and common themes.

Counselling Older Adults Bernard Kingston, Eleanor O'Leary, 1996 Presents an approach derived from the author's use of gestalt therapy. *Counseling Older Adults* John Blando, 2014-04-08 Counseling Older Adults provides an introduction to gerontological counseling covering theories of aging and their practical application in counseling work with older adults.

Older Adults in Psychotherapy Bob Knight, 1992-01-09 What is it like to counsel the older client? What issues are most often addressed? What mistakes pitfalls and oversights can be made in counseling the older client? And which counseling techniques work best with older adults?

Reassuring to both new and experienced practitioners and students. *Older Adults in Psychotherapy* reaffirms what working with the older client is all about. *Older Adults in Psychotherapy* vividly presents 20 case histories of older people in psychotherapy. Written to stand alone or in conjunction with Bob Knight's successful volume *Psychotherapy with Older Adults* this volume covers many important issues including depression, grieving, preparation for death, caregiving, issues, anxiety, sexuality, and long term mental disorders. In each chapter the case presentation is followed by an explication of the content, themes, as well as a specific discussion on rapport building, treatment techniques used in the case, gerontological issues, and transference issues. Also introduced is a maturity specific challenge model for thinking about therapy with the elderly. Through the insightful presentation of case histories, Knight helps practitioners and students in gerontology, social work, psychiatry, psychology, nursing, and health care become more sensitive to the needs of older clients and more effective in their treatment techniques. The book makes an important contribution to the field. It will be useful to therapists in training from a variety of disciplines, for example social workers, psychologists, psychiatrists, and geriatric nurse practitioners, to faculty members involved in training new professionals in these disciplines and to current practitioners in the fields of psychiatry, psychology, social work, and nursing who want to extend and expand their expertise in aging. All of these audiences will find the material very useful, very accessible, with clear implications for their day to day practice. This is a very important book on a timely and important topic. Michael A. Smyer, The Pennsylvania State University. The case histories vividly demonstrate the mix of medical, social, and psychological problems and that in itself will make a strong contribution to the field. Practitioners at

all levels can learn something both from what Knight does and doesn't do in his case histories. It should be a particularly illuminating experience for beginning therapists. Ruth Campbell, The University of Michigan Medical Center, Ann Arbor. **Older Adults in Psychotherapy** definitely makes a distinct contribution in the field. Real full-bodied cases about elderly people are hard to find. I would buy the book and inform colleagues about it and I would use it as a text in classes such as Counseling Older Adults. There is an impressive willingness on Dr. Knight's part to describe his own feelings, failings, oversights, etc. He comes through as emotionally accessible and believable as a therapist. It would be wonderful for students in training to read such accounts and for those of us long graduated to be reassured that others also deal with these issues. Sandra M. Powers, The University of North Carolina at Greensboro. Throughout the book, Knight adopts a very honest and personal style and he is not afraid to include his feelings or the shortcomings in his work. His open rejection of a loss deficit model of ageing in favour of one emphasizing growth toward maturity is refreshing, optimistic and in my experience more accurate. Certainly this is a book that will resonate with those familiar with this population as well as being a useful source of inspiration for those new in this area. Clinical Psychology Forum.

Handbook of Counseling and Psychotherapy with Older Adults Michael Duffy, 1999-07-15. With the graying of society, therapists are seeing more and more older clients. In this book, editor Michael Duffy brings together leading experts to explain the unique problems of older adults and describe effective treatment techniques.

A Guide to Psychotherapy and Aging Bob Knight, Steven H. Zarit, 1996. Includes an English translation of the report on world regional and national economic conditions submitted to the Romanian Parliament with a summary of the Bank's monetary and foreign exchange policies and a report of its activities for the year covered.

Psychotherapy and Counseling With Older Women Claire M. Brody, PhD, Frances K. Trotman, PhD, 2001-12-28. Trotman and Brody along with expert contributors view older women through a feminist lens and examine social constructs concerning aspects of aging, caregiving, elders' relationships with family, health, body image and sexuality concerns. The authors define issues that are important to older women and their emotional health and bring into sharp relief some of the painful issues professionals must confront in counseling older women.

Psychotherapy with Older Men Tammi Vacha-Haase, Stephen R. Wester, Heidi Fowell Christianson, 2011-01-19. Society imposes a strict masculinity construct on boys and men, dictating how they are expected to behave as a real man, including the idea that they should not display weakness through mental and emotional issues. As men age, however, it becomes increasingly difficult and even impossible for them to fulfill this role due to the limitations that aging imposes. Thus, elderly men may feel ashamed of their seeming inability to cope with these changes while maintaining their traditional male identities, especially regarding physical and mental illness. This book intends to highlight the resulting social stigma older men experience by exploring the context of their lives, the challenges they face and the clinical process of helping them in counseling and psychotherapy.

Ageing and Older Adult Mental Health Patrick Ryan, Barry J. Coughlan, 2013-03-01. This book examines the issues and implications that mental health professionals face.

when dealing with ageing and older adults The book focuses on the biological psychological and cultural influences that impact on the work of mental health practitioners who work with this client group Based on current empirical research and evidence based practical issues this book explores topics including ageing and dementia elder abuse caring for older adults depression and ageing the paradox of ageing how older adults are key to the success of future generations Throughout the book the contributors emphasise the notion of healthy ageing and the importance and significance of this concept as part of the life cycle process As such Ageing and Older Adult Mental Health will be key reading not only for mental health professionals but also for those involved in policy making for older adults *Therapy Over 50* Jeffrey A. Kottler,Jon Carlson,2016

Therapy Over 50 discusses how psychotherapy is different for both the therapist and client after the age of fifty The text deals with the inevitable and unrelenting changes that take place along with the corresponding lost dreams It provides both hope and help for those elderly therapists and their clients
