Olive Production Manual G. Steven Sibbett, Louise Ferguson, 2005 This bestselling manual is the definitive guide to olive production in California. This 180 page manual is fully illustrated with 40 tables, 19 line drawings and 36 charts and 100 color and black and white photos. The most notable additions to this edition include a new chapter on deficit irrigation, a greatly expanded chapter on olive oil production and coverage of four new pests including the olive fly. Includes production techniques for commercial growers worldwide from orchard planning and maintenance to harvesting and postharvest processing. Contains information on pollination, pruning for shaker and vertical rotating comb harvest, mechanical pruning, deficit irrigation, mechanical harvesting methods including trunk shaking and canopy contact harvesters, postharvest handling and processing methods and olive oil production. Also includes information on new pests including olive fly, oleander scale, olive mite and black vine weevil.

**Olive Production Manual for Oil** Selina C Wang, Louise Ferguson, 2024-08-01 The olive oil industry in California has undergone a sea change over the last decade with acreage of oil olives surpassing that of table olives. Now UC researchers and industry leaders turn their expertise to this important market. This extensive manual covers all aspects of olive production for oil from orchard site selection to processing of virgin olive oil. Changes fueling the growth in production are covered including establishing high density and super high density orchards, the latest methods of irrigation management and harvesting methods. The concepts presented in the book are scalable, benefiting large and niche growers alike. Topics covered include International and California standards for olive oil grades, Soil and nutrient management, Canopy management, Anthropod pests including the invasive olive fruit fly and the olive psyllid, Nematode pests, Diseases, Weed management, Spray application techniques, Harvesting efficiency. Written in the easy to use style you've come to expect from UC ANR and accompanied by color photos, tables and worksheets. Each chapter leads with a bullet list of key concepts covered in the chapter. This is a must have manual for everyone in the olive oil industry.

**Organic Olive Production Manual** Paul M. Vossen, 2007-03-15 This manual provides detailed information for growers on production issues, plant nutrition, economics, pest and weed control, management of olive wastes, the conversion process and organic certification and registration. Using this manual, you'll learn about orchard site selection, considerations, irrigation needs, terrain, temperature, soil damage from the olive fruit fly and how these may vary for table fruit versus fruit for oil production. You'll also learn how to evaluate harvest methods, an important consideration as harvest costs typically amount to half the total production cost for olives. This manual has been developed as a supplement to the Olive Production Manual 2nd Edition. Organic growers are advised to consult both publications as they develop and refine their production systems.
