## **On Brentano:**

**On Brentano** Victor Velarde-Mayol, 2000 This brief text assists students in understanding Brentano's philosophy and thinking so that they can more fully engage in useful intelligent class dialogue and improve their understanding of course content Part of the Wadsworth Philosophers Series which will eventually consist of approximately 100 titles each focusing on a single thinker from ancient times to the present ON BRENTANO is written by a philosopher deeply versed in the philosophy of this key thinker Like other books in the series this concise book offers sufficient insight into the thinking of a notable philosopher better enabling students to engage in the reading and to discuss the material in class and on paper

Brentano's Mind Markus Textor, 2017 Mark Textor presents a critical study of the work of one of the most important thinkers of the 19th century How is the mental distinct from the physical What must awareness of seeing hearing etc be like to be infallible What does the unity of a conscious mental life consist in Textor shows how Brentano helps us to answer these questions

Brentano's Philosophical System Uriah Kriegel, 2018-02-13 Uriah Kriegel presents a rich exploration of the philosophy of the great nineteenth century thinker Franz Brentano He locates Brentano at the crossroads where the Anglo American and continental European philosophical traditions diverged At the centre of this account of Brentano's philosophy is the connection between mind and reality Kriegel aims to develop Brentano's central ideas where they are overly programmatic or do not take into account philosophical developments that have taken place since Brentano's death a century ago and to offer a partial defense of Brentano's system as quite plausible and in any case extraordinarily creative and thought provoking Brentano's system grounds a complete metaphysics and value theory in a well developed philosophy of mind and accordingly the book is divided into three parts devoted to Brentano's philosophy of mind his metaphysics and his moral philosophy The book's fundamental ambition is to show how Brentano combines the clarity and precision of the analytic philosopher with the sweeping vision of the continental philosopher Brentano pays careful attention to important distinctions conscientiously defines key notions presents precise arguments for his claims judiciously considers potential objections and in general proceeds very methodically yet he does so not as an end in itself but as a means only His end is the crafting of a grand philosophical system in the classical sense attempting to produce nothing less than a unified theory of the true the good and the beautiful

Edward Bradford Titchener, 1905 The general purpose with which this book has been written is sufficiently indicated by its title I have selected a number of the classical experiments of Experimental Psychology and have tried to present them in such a way that their performance shall have a real disciplinary value for the undergraduate student Within this general purpose my aim has been two fold I have sought to show in the first place that psychology is above the laboratory that we employ our instruments of precision not for their own sake but solely because they help us to a refined and more accurate introspection And secondly just as in my Outline of Psychology and Primer of Psychology I gave the results of experimentation a prominent place in the psychological system so here I have treated the selected experiments not as separate exercises but as points of departure for systematic discussion PsycINFO Database Record c 2005 APA all rights reserved [Psychological Review](#)
