On Husserl:

On Husserl Victor Velarde-Mayol, 2000 This brief text assists students in understanding Husserl's philosophy and thinking so that they can more fully engage in useful intelligent class dialogue and improve their understanding of course content Part of the Wadsworth Philosophers Series which will eventually consist of approximately 100 titles each focusing on a single thinker from ancient times to the present ON HUSSERL is written by a philosopher deeply versed in the philosophy of this key thinker Like other books in the series this concise book offers sufficient insight into the thinking of a notable philosopher better enabling students to engage in the reading and to discuss the material in class and on paper *Logic and Time* Krzysztof Michalski, 1997 The subject of this study is Husserl's theory of meaning from his critique of psychologism and the theory of meaning that stems from it through the transcendental theory of meaning of *The Idea of Phenomenology* Ideas I and Cartesian Meditations to the theory of time consciousness and its consequences for Husserl's understanding of meaning Throughout the study the tension in Husserl's thought between two interpretative strategies the Cartesian and the Hermeneutical is brought to the fore **Edmund Husserl's Phenomenology** Joseph J. Kockelmans, 1994 In *Edmund Husserl's Phenomenology* Joseph J. Kockelmans provides the reader with a biographical sketch and an overview of the salient features of Husserl's thought Kockelmans focuses on the essay for the *Encyclopedia Britannica* of 1928 Husserl's most important effort to articulate the aims of phenomenology for a more general audience Included are Husserl's text in the original German and in English translation on facing pages a synopsis and an extensive commentary that relates Husserl's work as a whole to the essay for the *Encyclopedia* *Husserl and the A Priori* Daniele De Santis, 2021-06-09 This book presents a systematic discussion of the development of Husserl's concept of the a priori from his early and through his later writings The chapters contained herein analyze the different phases and aspects of Husserl's phenomenology of the a priori in light of his twofold notion of reason construed as both ontological and transcendental Starting from the assessment of the introduction of the notion of a priori knowledge in the context of the *Logical Investigations* this text uniquely explores its development during the Göttingen years It is at this time during his work on *The Crisis of European Sciences* that Husserl comes to see the a priori as a criterion to interpret the history of philosophy notably modern philosophy This book sheds light upon such concepts as essence and eidos ideation eidetic attitude and eidetic reduction as well as formal and material innate and contingent a priori The author argues that the a priori becomes for Husserl the expression of an ontological form of rationality i.e. the rationality immanent to being This book appeals to students and researchers working on Husserl and phenomenology *Derrida and Husserl* Leonard Lawlor, 2002-07-04 A magnificent work that will definitely shape the discussion on Derrida for years to come Rodolphe Gasché What is the nature of the relationship of Jacques Derrida and deconstruction to Edmund Husserl and phenomenology Is deconstruction a radical departure from phenomenology or does it trace its origins to the phenomenological project In *Derrida and Husserl* Leonard Lawlor illuminates Husserl's influence on

the French philosophical tradition that inspired Derrida's thought. Beginning with Eugen Fink's pivotal essay on Husserl's philosophy, Lawlor carefully reconstructs the conceptual context in which Derrida developed his interpretation of Husserl. Lawlor's investigations of the work of Jean Cavaillès, Tran Duc Thao and Jean Hyppolite as well as recent texts by Derrida reveal the depth of Derrida's relationship to Husserl's phenomenology. Along the way, Lawlor revisits and sheds light on the origin of many important Derridean concepts such as deconstruction, the metaphysics of presence, difference, intentionality, the trace and spectrality.

Commentary on Husserl's "Ideas I" Andrea Staiti, 2015-09-14 Husserl's *Ideas for a Pure Phenomenology and Phenomenological Philosophy* 1913 is one of the key texts of twentieth-century philosophy. It is the first of Husserl's published works to present his distinctive version of transcendental philosophy and to put forward the ambitious claim that phenomenology is the fundamental science of philosophy. In *Ideas*, Husserl introduces for the first time the conceptual arsenal of his mature phenomenology: the principle of all principles, the phenomenological epoch and reduction, pure consciousness and the noema. All these difficult notions have been influential and controversial in subsequent philosophy, both analytic and Continental. In this commentary, thirteen leading scholars of Husserlian phenomenology set out to clarify and defend Husserl's views, connecting them to the vast corpus of his published and unpublished writings and discussing the main available interpretations in the existing scholarship. The result is a detailed and comprehensive account of the most original form of transcendental philosophy since Kant's *Critique of Pure Reason*.

Speech and Phenomena Jacques Derrida, 1973 *Speech and phenomena: Form and meaning* **Difference** **Crisis and Reflection** J. Dodd, 2004-07 James Dodd pursues an interpretation of Husserl's text that emphasizes the importance of the problem of the origin of philosophy as well as advances the thesis that for Husserl, the crisis of reason is not a contingent historical event but a permanent feature of a life in reason generally.

BOOK JACKET *Essays on Husserl's Logic and Philosophy of Mathematics* Stefania Centrone, 2017-09-07 *Essays on Husserl's Logic and Philosophy of Mathematics* sets out to fill up a lacuna in the present research on Husserl by presenting a precise account of Husserl's work in the field of logic, of the philosophy of logic and of the philosophy of mathematics. The aim is to provide an in-depth reconstruction and analysis of the discussion between Husserl and his most important interlocutors and to clarify pivotal ideas of Husserl's by considering their reception and elaboration by some of his disciples and followers such as Oskar Becker and Jacob Klein as well as their influence on some of the most significant logicians and mathematicians of the past century such as Luitzen E. J. Brouwer, Rudolf Carnap, Kurt Gödel and Hermann Weyl. Most of the papers consider Husserl and another scholar, e.g. Leibniz, Kant, Bolzano, Brentano, Cantor, Frege, and trace out and contextualize lines of influence, points of contact and points of disagreement. Each essay is written by an expert of the field and the volume includes contributions both from the analytical tradition and from the phenomenological one.

Husserl John J. Drummond, Otfried Höffe, 2019-06-04 Edmund Husserl, generally regarded as the founding figure of phenomenology, exerted an enormous influence on the course of twentieth and twenty-first-century philosophy. This volume

collects and translates essays written by important German speaking commentators on Husserl ranging from his contemporaries to scholars of today to make available in English some of the best commentary on Husserl and the phenomenological project. The essays focus on three problematics within phenomenology: the nature and method of phenomenology, intentionality with its attendant issues of temporality and subjectivity and intersubjectivity and culture. Several essays also deal with Martin Heidegger's phenomenology although in a manner that reveals not only Heidegger's differences with Husserl but also his reliance on and indebtedness to Husserl's phenomenology. Taken together, the book shows the continuing influence of Husserl's thought demonstrating how such subsequent developments as existentialism, hermeneutics and deconstruction were defined in part by how they assimilated and departed from Husserlian insights. The course of what has come to be called continental philosophy cannot be described without reference to this assimilation and departure and among the many successor approaches, phenomenology remains a viable avenue for contemporary thought. In addition, problems addressed by Husserl, most notably intentionality, consciousness, the emotions and ethics, are of central concern in contemporary non-phenomenological philosophy and many contemporary thinkers have turned to Husserl for guidance. The essays demonstrate how significant Husserl remains to contemporary philosophy across several traditions and several generations. Includes essays by Rudolf Bernet, Klaus Held, Ludwig Landgrebe, Dieter Lohmar, Verena Mayer and Christopher Erhard Ullrich, Melle Karl, Mertens, Ernst Wolfgang Orth, Jan Patočka, Sonja Rinofner Kreidl, Karl Schuhmann and Elisabeth Stricker.

The Philosophy of Edmund Husserl Dorion Cairns, 2012-10-02. The present volume containing the dissertation of Dorion Cairns is the first part of a comprehensive edition of the philosophical papers of one of the foremost disseminators and interpreters of Husserlian phenomenology in North America. Based on his intimate knowledge of Husserl's published writings and unpublished manuscripts and on the many conversations and discussions he had with Husserl and Fink during his stay in Freiburg i Br in 1931-1932, Cairns's dissertation is a comprehensive exposition of the methodological foundations and the concrete phenomenological analyses of Husserl's transcendental phenomenology. The lucidity and precision of Cairns's presentation is remarkable and demonstrates the secure grasp he had of Husserl's philosophical intentions and phenomenological distinctions. Starting from the phenomenological reduction and Husserl's Idea of Philosophy, Cairns proceeds with a detailed analysis of intentionality and the intentional structures of consciousness. In its scope and in the depth and nuance of its understanding, Cairns's dissertation belongs beside the writings on Husserl by Levinas and Fink from the same period.

The Invention of Infinity: Essays on Husserl and the History of Philosophy Claudio Majolino, 2023-09-29 This book covers Husserl's stance on the philosopher and the history of philosophy: whether or not such a history is part of the philosophical attitude itself and if so how Husserl's phenomenology might weigh in on such matters. Firstly, this text spells out some of the manifold ways in which the history of philosophy works its way in Husserl's phenomenology, showing how concepts, methods and problems drawn from various Ancient and Modern philosophical traditions: Platonism, Aristotelianism, Sophistry, Stoicism, Scholasticism, Modern Rationalism are transformed and embedded within transcendental phenomenology itself. Secondly, it shows how a better understanding of the distinctive patterns by means of which Husserl's phenomenology confronts the history of philosophy could be extremely significant for historians of philosophy who are interested in learning something entirely new about the unexplored horizons of such concepts, methods and problems. Finally, based on such twofold historical and philosophical approach and thanks to a substantial reinterpretation of some key phenomenological concepts such as multiplicity, constitution, attitude and variation, this book provides a novel and original reading of Husserl's overall philosophical project in its full meaning and scope. By doing so, this volume appeals to both students and researchers and critically engages in mainstream interpretations of phenomenology, suggesting a unique take on the idea of transcendental phenomenology as a whole.
