On Leibniz:

On Leibniz Nicholas Rescher, 2014-07-15 Contemporary philosopher John Searle has characterized Gottfried Wilhelm Leibniz 1646 1716 as the most intelligent human being who has ever lived The German philosopher mathematician and logician invented calculus independently of Sir Isaac Newton topology determinants binary arithmetic symbolic logic rational mechanics and much more His metaphysics bequeathed a set of problems and approaches that have influenced the course of Western philosophy from Kant in the eighteenth century until the present day *On Leibniz* examines many aspects of Leibniz's work and life This expanded edition adds new chapters that explore Leibniz's revolutionary deciphering machine his theoretical interest in cryptography and its ties to algebra his thoughts on eternal recurrence theory his rebuttal of the thesis of improbability in the world and cosmos and an overview of American scholarship on Leibniz Other chapters reveal Leibniz as a substantial contributor to theories of knowledge Discussions of his epistemology and methodology its relationship to John Maynard Keynes and Talmudic scholarship broaden the traditional view of Leibniz Rescher also views Leibniz's scholarly development and professional career in historical context As a philosopher courtier to the Hanoverian court Leibniz was associated with the leading intellectuals and politicians of his era including Spinoza Huygens Newton Queen Sophie Charlotte and Tsar Peter the Great Rescher extrapolates the fundamentals of Leibniz's ontology the theory of possible worlds the world's contingency space time frameworks and intermonadic relationships In conclusion Rescher positions Leibniz as a philosophical role model for today's scholars He argues that many current problems can be effectively addressed with principles of process philosophy inspired by Leibniz's system of monadology

Leibniz Nicholas Rescher, 1979 New Essays on Leibniz's Theodicy Larry M. Jorgensen, Samuel Newlands, 2014-02-20 In 1710 G W Leibniz published *Theodicy* *Essays on the Goodness of God the Freedom of Man and the Origin of Evil* This book the only one he published in his lifetime established his reputation more than anything else he wrote The *Theodicy* brings together many different strands of Leibniz's own philosophical system and we get a rare snapshot of how he intended these disparate aspects of his philosophy to come together into a single overarching account of divine justice in the face of the world's evils At the same time the *Theodicy* is a fascinating window into the context of philosophical theology in the seventeenth century Leibniz had his finger on the intellectual pulse of his time and this comes out very clearly in the *Theodicy* He engages with all of the major lines of theological dispute of that time demonstrating the encyclopaedic breadth of his understanding of the issues Leibniz's *Theodicy* remains one of the most abiding systematic accounts of how evil is compatible with divine goodness Any treatment of the problem of evil must at some point come to grips with Leibniz's proposed solution This volume refreshes and deepens our understanding of this great work Leading scholars present original essays which critically evaluate the *Theodicy* providing a window on its historical context and giving close attention to the subtle and enduring philosophical arguments

W. Arthur,Richard Arthur,2021 In this book Arthur gives fresh interpretations of Gottfried Leibniz s theories of time space and the relativity of motion based on a thorough examination of Leibniz s manuscripts as well as his published papers These are analysed in historical context but also with an eye to their contemporary relevance Leibniz s views on relativity have been extremely influential first on Mach and then on Einstein while his novel approach to geometry in his analysis situs inspired many later developments in geometry Arthur expounds the latter in some detail explaining its relationship to Leibniz s metaphysics of space and the grounding of motion and defending Leibniz s views on the relativity of motion against charges of inconsistency The brilliance of his work on time though has not been so well appreciated and Arthur attempts to remedy this through a detailed discussion of Leibniz s relational theory of time showing how it underpins his theory of possible worlds his complex account of contingency and his highly original treatment of the continuity of time providing formal treatments in an appendix In other appendices Arthur provides translations of previously untranslated writings by Leibniz on analysis situs and on Copernicanism as well as an essay on Leibniz s philosophy of relations In his introductory chapter he explains how the framework for the book is provided by the interpretation of Leibniz s metaphysics he defended in his earlier Monads Composition and Force OUP 2018 winner of the 2019 annual JHP Book Prize for best book in the history of philosophy published in 2018 **Leibniz's Naturalized Philosophy of Mind** Larry M. Jorgensen,2019-02-21 Larry M Jorgensen provides a systematic reappraisal of Leibniz s philosophy of mind revealing the full metaphysical background that allowed Leibniz to see farther than most of his contemporaries In recent philosophy much effort has been put into discovering a naturalized theory of mind Leibniz s efforts

to reach a similar goal three hundred years earlier offer a critical stance from which we can assess our own theories But while the goals might be similar the content of Leibniz's theory significantly diverges from that of today's thought Perhaps surprisingly Leibniz's theological commitments yielded a thoroughgoing naturalizing methodology the properties of an object are explicable in terms of the object's nature Larry M Jorgensen shows how this methodology led Leibniz to a fully natural theory of mind
