On A Human Scale A Life In City Design:

On a Human Scale Gordon Stephenson, 1992 **Le Corbusier in the Antipodes** Antony Moulis, 2020-12-30 This book considers the architect Le Corbusier's encounters with Australia and New Zealand as a two way exchange showing the impact of his ideas and projects on architects of the region whilst also revealing counterinfluences on Le Corbusier in his post war career that were activated by his contacts Compiled from detailed archival research undertaken at the Fondation Le Corbusier Paris and nationally based archives *Le Corbusier in the Antipodes* brings together a set of episodes placing them in context with the history of modern art architecture and urbanism in 20th century Australia and New Zealand Key exchanges between Le Corbusier and others never before described are presented and analyzed including Le Corbusier's contact with Australian architect Harry Seidler at Chandigarh Le Corbusier's drawing of the plan of Adelaide in 1950 and his creative collaboration with Jorn Utzon on art for the Sydney Opera House This book also includes analysis of previously unseen Le Corbusier artworks which formed part of the Utzon family collection In reading these personal and contingent moments of encounter the book puts forward new ways of understanding the dissemination and mediation of Le Corbusier's ideas and their effects in post war Australia and New Zealand These antipodean contacts are set against the broader story of Le Corbusier's career questioning received interpretations of his design methods and current assumptions about the influence of his work in national contexts beyond Europe **Fundamentals of Sustainable Urban Design** Avi Friedman, 2020-12-10

This book begins with an introduction describing current societal transformations that merit new urban designs including depletion of non renewable natural resources elevated levels of greenhouse gas emissions large numbers of aging Baby Boomers and climate change Dr Friedman then examines these challenges through thirty chapters of interest to urban designers architects civil and construction engineers and town planners Each of these topics represents an aspect of urban design and describes an innovative solution and offers a detailed description of underlying principles The highly illustrated text presents innovative urban design strategies based on sustainable principles Integrated with each chapter are several international case studies illustrating design implementations Creating Sustainable Cities Through Pedestrian Urbanism

Hyesun Jeong, 2026-01-27 As cities grapple with climate change and social inequality a growing movement recognizes walking as fundamental to urban sustainability *Creating Sustainable Cities Through Pedestrian Urbanism* explores how communities worldwide are rethinking the relationship between mobility place and belonging Drawing from diverse cities across North America Europe and Asia this book examines the shift from car dominated planning toward human centered design It traces how walkable environments support environmental goals while fostering social connection and cultural vitality demonstrating that sustainable cities are also more equitable and livable cities This book investigates varied examples cultural programming in transit stations night festivals and murals pedestrian friendly street transformations adaptive public spaces and community led initiatives It considers how everyday elements caf culture green infrastructure

neighborhood events contribute to places that are both environmentally responsible and socially cohesive Written for urban practitioners community advocates and engaged citizens this book offers insights rather than prescriptions recognizing that each place requires its own approach to pedestrian urbanism By examining what works and what doesn't across different contexts and scales *Creating Sustainable Cities Through Pedestrian Urbanism* contributes to ongoing conversations about building cities that serve both people and planet Sustainable urban futures it suggests may be closer than we walk

Urban Design Tim Heath, Florian Wiedmann, 2025-10-30 *Urban Design The Basics* provides a brief but compelling overview and introduction to the theory and practice of the multi disciplinary field of urban design It is an easy to understand and jargon free introduction to the fundamental principles of urban design By introducing the essentials of urban design the book is an important starting point for future study of the discipline Topics include placemaking sustainable urbanism the evolution of cities and townscapes and urban design and governance Across seven chapters the book is centred on a holistic

understanding of sustainability and the special role of urban design in achieving a high quality of urban life economic diversification and less energy consumption It provides a clear overview of the evolution of urban design drawing on fundamental principles and critical challenges and negotiates the complexities and nuances of the discipline Given the contemporary international importance of urban design the book uses examples from around the globe to explain its role and impact in different contexts It also features detailed further reading lists for those wishing to expand their knowledge and understanding further Urban Design The Basics will be of keen interest to those fascinated with cities and urban design students and practitioners who are looking to supplement their knowledge of key urban design principles Planning the Twentieth-Century City Stephen V. Ward, 2002-04-03 This book reveals the complex interplay of planning ideas and practices between local national and international levels throughout this century The book moves from German zoning the aesthetics of grand urban and landscape design from France and the USA and the utopian English idea of the garden city through to the dynamism of the Asian tiger cities and the environmental ideology of the late 20th century It creates an international body of knowledge and expertise With case material from major cities in Western Europe North America Australia and Asia this book charts the changing centres of influence in planning and identifies the cities which will lead the way in the next century

Planning for the Caring City Claire Freeman, Etienne Nel, 2024-04-29 As the world has become increasingly urbanised and planetary well being ever more threatened questions have emerged over just what the priorities should be for how we live in cities Clearly for many the current ways of planning and managing city environments are not working given so many of their human and non human inhabitants struggle on a daily basis to maintain their well being and survival Different approaches to city development are crucial if they are to be inclusive places where all can thrive Ensuring that cities are safe and sustainable and provide a level of care for all their residents places a significant mandate on those who manage cities and on planners in particular This book examines all the parts of the city where care needs to be incorporated how we plan create nurturing environments include all who live there build sensitively support meaningful livelihoods and enable compassionate governance With planners in mind this book examines why care is needed in the urban environment and drawing on real world examples examines how it can be applied in an effective and empowering fashion *The City Reader* Richard T. LeGates, Frederic Stout, 2011-01-11 The fifth edition of the highly successful City Reader juxtaposes the best classic and contemporary writings on the city It contains fifty seven selections including seventeen new contributions by experts including Elijah Anderson Robert Bruegmann Michael Dear Jan Gehl Harvey Molotch Clarence Perry Daphne Spain Nigel Taylor Samuel Bass Warner and others some of which have been newly written exclusively for The City Reader Classic writings from Ebenezer Howard Ernest W Burgess LeCorbusier Lewis Mumford Jane Jacobs and Louis Wirth meet the best contemporary writings of Sir Peter Hall Manuel Castells David Harvey Kenneth Jackson This edition of The City Reader has been extensively updated and expanded to reflect the latest thinking in each of the disciplinary areas included and in topical

areas such as sustainable urban development climate change globalization and the impact of technology on cities The plate sections have been extensively revised and expanded and a new plate section on global cities has been added The anthology features general and section introductions and introductions to the selected articles New to the fifth edition is a bibliography listing over 100 of the top books for those studying Cities *Town & Country Planning* ,1995 **The City Builders** Susan S. Fainstein,2001 This revised edition examines major redevelopment efforts in New York and London to uncover the forces behind these investment cycles and the role that public policy can play in moderating market instability It chronicles the progress of three development projects in New York and three in London **Avery Index to Architectural Periodicals**, 1992 Avery Library,1993 **Town Planning Towards City Development** Sir Patrick Geddes,1918 **Harvard Design Magazine** ,2006 **Calcutta Review** ,1965 **Metropolitan Planning Department of Marion County Training Program** Marion County (Ind.).
