Art and Architecture Jane Rendell, 2006 Introduction A Place Between Between Here and There Introduction Space Place and Site Site Non Site Off Site The Expanded Field Space as Practised Place Between Now and Then Introduction Allegory Montage and Dialectical Image Ruin as Allegory Insertion as Montage **Warped Space** Anthony Vidler, 2002-02-22 How psychological ideas of space have profoundly affected architectural and artistic expression in the twentieth century Beginning with agoraphobia and claustrophobia in the late nineteenth century followed by shell shock and panic fear after World War I phobias and anxiety came to be seen as the mental condition of modern life They became incorporated into the media and arts in particular the spatial arts of architecture urbanism and film This spatial warping is now being reshaped by digitalization and virtual reality Anthony Vidler is concerned with two forms of warped space The first a psychological space is the repository of neuroses and phobias This space is not empty but full of disturbing forms including those of architecture and the city The second kind of warping is produced when artists break the boundaries of genre to depict space in new ways Vidler traces the emergence of a psychological idea of space from Pascal and Freud to the identification of agoraphobia and claustrophobia in the nineteenth century to twentieth century theories of spatial alienation and estrangement in the writings of Georg Simmel Siegfried Kracauer and Walter Benjamin Focusing on current conditions of displacement and placelessness he examines ways in which contemporary artists and architects have produced new forms of spatial warping The discussion ranges from theorists such as Jacques Lacan and Gilles Deleuze to artists such as Vito Acconci Mike Kelley Martha Rosler and Rachel Whiteread Finally Vidler looks at the architectural experiments of Frank Gehry Coop Himmelblau Daniel Libeskind Greg Lynn Morphosis and Eric Owen Moss in the light of new digital techniques that while relying on traditional perspective have radically transformed the composition production and experience perhaps even the subject itself of architecture *Arts and Crafts Architecture* Peter Davey, 1995 An account of the lives theories and work of the architects of the Arts and Crafts movement which began in England and quickly influenced Europe and America It shows how the ideas of the movement influenced the California and Prairie Schools as well as Art Nouveau Second edition originally published in 1995 Gordon Matta-Clark Stephen Walker, 2011-05-10 Known for and even overshadowed by his brutal and spectacular building cuts Gordon Matta Clark's oeuvre is unique in the history of American art He worked in the 1970s on the borders between art and architecture and his diverse practice is often understood as an outright rejection of the tenets of high modernism Stephen Walker argues instead for the artist's ambivalent relationship with the architectural heritage he is often claimed to disavow thus making this the first book to extrapolate Matta Clark's thinking beyond its immediate context Walker considers the broad range of Matta Clark's ephemeral practice from montage to actual interventions and from performance art and installation to drawing film and video Bringing to the fore the consistent themes and issues explored through this broad range of media and in particular the complex notion of the discreet violation he

reveals the continued relevance of Matta Clark's artistic and theoretical oeuvre to the reception of artistic and architectural work today

Experiencing Art and Architecture Sanda Iliescu, 2022-03-22

In this multidisciplinary book Sanda Iliescu articulates a rich multi-faceted approach to the aesthetic experience. Through in-depth discussions of her own lived encounters with art, architecture and the world around her, she advocates a way of looking that blends sensory perception, formal analysis, social and political consciousness and personal memory. Focusing special attention on the aesthetic concept of the figure-ground problem, the author challenges this foundational principle's presumed hierarchies and shows how a new and more dynamic understanding of it can enhance our way of looking at and understanding art and architecture. Works discussed in the book include a wide range of contemporary and historic art and architecture among them artworks by Rembrandt, Matisse, Eva Hesse and David Hammons; architecture by Zaha Hadid, Peter Zumthor and Weiss Manfredi; and non-Western works such as a thirteenth-century Chinese vase and the Ryōanji dry garden in Kyoto, Japan. Personal and engaging, this book is for a wide audience of those practicing, studying or with an interest in the creative fields from beginners to seasoned professionals.

Art, Architecture, and the Moving Viewer, c. 300-1500 CE, 2022-04-19

Premodern architecture and built environments were fluid spaces whose configurations and meanings were constantly adapting and changing. The production of transitory meaning transpired whenever a body or object moved through these dynamic spaces. Whether spanning the short duration of a procession or the centuries of a building's longue durée, a body or object in motion created in the moment narratives that unfolded through time and space. The authors in this volume forge new approaches to architectural studies by focusing on the interaction between monuments, artworks and their viewers at different points in space and time. Contributors are Christopher A. Born, Elizabeth Carson Pastan, Nicole Corrigan, Gillian B. Elliott, Barbara Franz, Anne Heath, Philip Jacks, Divya Kumar, Dumas, Brigitte Kurmann Schwarzs, Ashley J. Laverock, Susan Leibacher, Ward, Elodie Leschot, Meghan Mattsson, McGinnis, Michael Sizer, Kelly Thor and Laura J. Whatley.

Contamination and Purity in Early Modern Art and Architecture Lauren Jacobi, Daniel Zolli, 2025-10-01

The concepts of purity and contamination preoccupied early modern Europeans, fundamentally structuring virtually every aspect of their lives, not least how they created and experienced works of art and the built environment. In an era that saw a great number of objects and people in motion, the meteoric rise of new artistic and building technologies and religious upheaval exerted new pressures on art and its institutions, anxieties about the pure and the contaminated, distinctions between the clean and unclean, sameness and difference, self and other, organization and its absence took on heightened importance. In this series of geographically and methodologically wide-ranging essays, thirteen leading historians of art and architecture grapple with the complex ways that early modern actors negotiated these concerns, covering topics as diverse as Michelangelo's unfinished sculptures, Venetian plague hospitals, Spanish Muslim tapestries and emergency currency. The resulting volume offers

surprising new insights into the period and into the modern disciplinary routines of art and architectural history Provides a novel perspective on the art and architecture of early modern Europe and its colonial territories by focusing on the opposing analytical categories of purity and contamination while also paying attention to their extraordinary theoretical and historical variety Offers new readings of works both canonical e g Michelangelo s unfinished sculptures D r e r s Italianate influences and less so e g Vermeyen s tapestries of the Conquest of Tunis Models a new approach to an important epoch in the history of art architecture and culture bringing together the close study of objects e g tapestries sculpture and coins and materials e g cosmetics dyes stone with wider topics such as global exchange and economics Inspires broader questions about the ideological underpinnings of early modernity while also offering new insights into the implications of the current material turn and global turn in the humanities Features twelve essays by leading scholars of the art and architecture of southern and northern Europe the colonial Americas and southeast Asia with correspondingly broad geographical and chronological coverage

Philip Johnson and His Mischief Christian Bjone, The Images Publishing Group, 2014-04-04 In the world of modern art the idea of appropriation or the conscious manipulation of the recognised world of another artist has long been accepted as a legitimate strategy in criticism of the tradition of art authorship challenging the context of viewing contemporary work and the manipulation of omnipresent media images The world of art itself is fair game to be pillaged or mined in the production of new art but there is almost no recognised equivalent aesthetic in architecture Philip Johnson consistently dealt with the concept of appropriation and used it as a design strategy from the very beginning of his illustrious career A singular taste maker Philip Johnson influenced art architecture and design during the second half of the 20th century Philip Johnson and His Mischief Appropriation in Art and Architecture looks at the concept of appropriation and how Johnson s style was influenced first by his mentor Mies van der Rohe and then by post modern ideas and artists This title serves to review Johnson s body of work and show that far from being a weakness his use of appropriation was a major part of his innovative success

The Art of Architecture Sir Albert Edward Richardson, 1972

The Architecture of Art History Mark Crinson, Richard J. Williams, 2018-12-13 What is the place of architecture in the history of art Why has it been at times central to the discipline and at other times seemingly so marginal What is its place now Many disciplines have a stake in the history of architecture sociology anthropology human geography to name a few This book deals with perhaps the most influential tradition of all art history examining how the relation between the disciplines of art history and architectural history has waxed and waned over the last one hundred and fifty years In this highly original study Mark Crinson and Richard J Williams point to a decline in the importance attributed to the role of architecture in art history over the last century which has happened without crisis or self reflection The book explores the problem in relation to key art historical approaches from formalism to feminism to the social history of art and in key institutions from the Museum of Modern Art to the journal October Among the key thinkers explored are Banham Baxandall Giedion Panofsky Pevsner Pollock Riegl Rowe

are well chosen and beautifully integrated into Oles's text. Indeed it feels as if his words emanate from the art itself. Donna Pierce, Denver Art Museum. This new interpretive history of Mexican art from the Spanish Conquest to the early decades of the twenty-first century is the most comprehensive introduction to the subject in fifty years. James Oles ranges widely across media and genres, offering new readings of painting, sculpture, architecture, prints, and photographs. He interprets major works by such famous artists as Diego Rivera and Frida Kahlo but also discusses less familiar figures in history and landscape painting, muralism, and conceptual art. The story of Mexican art is set in its rich historical context by the book's treatment of political and social change. The author draws on recent scholarship to examine crucial issues of race, class, and gender, including the work of indigenous artists during the colonial period and of women artists in the nineteenth and twentieth centuries. Throughout, Oles shows how Mexican artists participated in local and international developments. He considers both native and foreign-born artists, from Baroque architects to kinetic sculptors, and highlights the important role played by Mexicans in the global art scene of the last five centuries.

The Routledge Companion to Criticality in Art, Architecture, and Design Chris Brisbin, Myra Thiessen, 2018-10-03. The Routledge Companion to Criticality in Art, Architecture, and Design presents an in-depth exploration of criticism and criticality in theory and practice across the disciplines of art, architecture, and design. Professional criticism is a vital part of understanding the cultural significance of designed objects and environments that we engage with on a daily basis, yet there is evidence to show that this practice is changing. This edited volume investigates how practitioners, researchers, educators, and professionals engage with, think about, and value the practice of critique. With contributions from a multi-disciplinary authorship from nine countries—the UK, USA, Australia, India, Netherlands, Switzerland, South Africa, Belgium, and Denmark—this companion provides a wide range of leading perspectives evaluating the landscape of criticality and how it is being shaped by technological and social advances. Illustrated with over 60 black and white images and structured into five sections, *The Routledge Companion to Criticality in Art, Architecture, and Design* is a comprehensive volume for researchers, educators, and students exploring the changing role of criticism through interdisciplinary perspectives.

Modernism in Art, Design and Architecture Christopher Crouch, 1999. This text summarizes and contextualizes the ideas that have formed visual arts practices in the 20th century. Art, design, and architecture are located in their social and political contexts, and the ideas of modernism are traced from the development of industrialized Europe at the turn of the century to the post-industrial, post-colonial present. The complex relationship between modernism and postmodernism in the visual arts is examined, and the book concludes with a review of the global impact of the new technologies on art and design production.
