Contemporary Approaches to Orientalism in Media and Beyond Tombul, Işıl,Sarı, Gülşah,2021-05-28 Orientalism is about much more than just information gathered about the East within its general postcolonial period In this period orientalism is a Western discourse that dominated and shaped the view of the East There is otherization in the way the West has historically looked at the East and within the information presented about it These original stories of travelers in the past and previous telling about the East are facing a reconstruction through modern types of media Cinema television news newspaper magazine internet social media photography literature and more are transforming the way the East is presented and viewed Under the headings of post orientalism neo orientalism or self orientalism these new orientalist forms of work in

combination with both new and traditional media are redefining orientalism in the media and beyond The Handbook of Research on Contemporary Approaches to Orientalism in Media and Beyond shows how both new media and traditional media deal with orientalism today through the presentation of gender race religion and culture that make up orientalist theory The chapters focus on how orientalism is presented in the media cinema TV photography and more This book is ideal for communications theorists media analysts practitioners researchers academicians and students working in fields that include mass media communications film studies ethnic studies history sociology and cultural studies The Transatlantic Dialogue on Higher Education Ulla Krieburnegg, 2011 Comparing apples and oranges frequently this is what we do when we talk about similarities and differences regarding higher education in the United States and Europe Based on the assumption that higher education policy texts are cultural texts to be interpreted this book deconstructs four US American cultural narratives within higher education co optation the frontier myth McDonaldization and the narrative of security and compares these to discourses prevailing in Europe Disputing the prevalent claim that both the recent European higher education transformation initiative the Bologna Process and the establishment of the European Higher Education Area EHEA have had absolutely no impact on US institutions of higher learning this study proves that cultural narratives in the last decade have strongly determined political and structural developments in higher education on both sides of the Atlantic This book therefore adds another facet to the transatlantic dialogue on higher education by providing a cultural critical perspective including the Foucauldian theory of governmentality as well as aspects of postcolonial theory *Bibliographic Guide to Psychology* New York Public Library. Research Libraries, 1999 *Power/Knowledge* Michel Foucault, 1980-11-12 Michel Foucault has become famous for a series of books that have permanently altered our understanding of many institutions of Western society He analyzed mental institutions in the remarkable *Madness and Civilization* hospitals in *The Birth of the Clinic* prisons in *Discipline and Punish* and schools and families in *The History of Sexuality* But the general reader as well as the specialist is apt to miss the consistent purposes that lay behind these difficult individual studies thus losing sight of the broad social vision and political aims that unified them Now in this superb set of essays and interviews Foucault has provided a much needed guide to Foucault These pieces ranging over the entire spectrum of his concerns enabled Foucault in his most intimate and accessible voice to interpret the conclusions of his research in each area and to demonstrate the contribution of each to the magnificent and terrifying portrait of society that he was patiently compiling For as Foucault shows what he was always describing was the nature of power in society not the conventional treatment of power that concentrates on powerful individuals and repressive institutions but the much more pervasive and insidious mechanisms by which power reaches into the very grain of individuals touches their bodies and inserts itself into their actions and attitudes their discourses learning processes and everyday lives Foucault's investigations of prisons schools barracks hospitals factories cities lodgings families and other organized forms of social life are each a segment of one of the most

astonishing intellectual enterprises of all time and as this book proves one which possesses profound implications for understanding the social control of our bodies and our minds **Popular Imagination** Sven-Erik Klinkmann,2002

Family Bonds Ellen K. Feder,2007-08-06 Feminist and critical race theorists alike have long acknowledged the intersection of gender and race difference it is by now a truism that the ways we become boys and girls men and women cannot be disentangled from the ways we become white or Black men and women Asian or Latino boys and girls And yet even as many have sought to attend to this intersection of difference most critical treatments focus finally either on the production of gender or the production of race Family Bonds proposes a new way to think about the categories of gender and race together It first explicates and then puts to work Foucault's archaeological and genealogical methods to advance the main argument of the book Gender is best understood primarily as a function of disciplinary power operating within the family while race is primarily a function of a regulatory power acting upon the family Each of the book's central chapters is an individual story or history the founding of Levittown the definitive suburb after the Second World War 1950s and 60s the development of the diagnosis of Gender Identity Disorder 1970s and 1980s and the federal coordination of scientific research on violence 1980s and 1990s Together they make up a larger story about the construction of race and gender in the U S in the second half of the twentieth century and demonstrate the centrality of the family in these constructions Rather than a formal study of Foucault's own work Family Bonds is an effort to produce genealogies of the sort that Foucault himself hoped his work would prompt *A Different Story* Karl-Olof Edström,2008 This book examines how aesthetics have been used over several centuries in both popular and art music It draws upon a broad spectrum of original sources and incorporates the work of writers outside the mainstream of established aesthetics discourse *Take Up the Black Man's Burden* Charles Edward Coulter,2006 Examines the people and institutions that shaped Kansas City's Black communities from the end of the Civil War until the outbreak of World War II blending rich historical research with first person accounts that allow participants in this historical drama to tell their own stories of struggle and accomplishment Provided by publisher

Lingua Franca ,1998 Philippe Ariès and the Politics of French Cultural History Patrick H. Hutton,2004 A revealing study of one of the twentieth century's most original and influential historians The author of *Centuries of Childhood* and other landmark historical works Philippe Aries 1914-1984 was a singular figure in French intellectual life He was both a political reactionary and a path breaking scholar a sectarian royalist who supported the Vichy regime and a founder of the new cultural history popularly known as *l'histoire des mentalités* that developed in the decades following World War II In this book Patrick H Hutton explores the relationship between Aries's life and thought and evaluates his contribution to modern historiography in France and abroad According to Hutton the originality of Aries's work and the power of his appeal derived from the way he drew together the two strands of his own intellectual life his enduring ties to the old cultural order valued by the right wing Action Française and a newfound appreciation for the methodology of the leftist Annales school of historians

private life that eventually won him a wide readership and in late life an appointment to the faculty of the prestigious Ecole des Hautes Etudes en Sciences Sociales At the same time he fashioned himself as a man of letters in the intellectual tradition of the Action française and became a perspicacious journalist as well as a stimulating writer of autobiographical memoirs In Hutton's view this helps explain why more than any other historian Philippe Aries left his personal signature on his scholarship

On the Way to Theory Lawrence Grossberg, 2024-09-13 In *On the Way to Theory* Lawrence Grossberg introduces the major ways of thinking that provide the backstory for contemporary Western theory Asking readers to think about thinking Grossberg traces cultural and critical theory's foundations from the contested enlightenments to modern and postmodern conceptualizations of power experience language and existence He introduces key figures as historical characters and lays out the unique set of tools for thought that their deep theories offer Through finely tuned and accessible descriptions of their concepts and logics Grossberg highlights thinkers including Spinoza Kant Hegel Marx Nietzsche Wittgenstein Heidegger Derrida Foucault Deleuze and Hall defining the possibilities of their thought This book is essential for those interested in how theories shape our understanding of the world influence our choices and define our realities It challenges us to recognize the multiplicity and complexities of ways of thinking in our quest for knowledge and understanding By setting out a story of theoretical foundations Grossberg invites readers to think toward the future of theory and expand conversations around theoretical scrutiny and criticism
