

ETHICS IN HUMAN RESOURCE MANAGEMENT (HRM)

Ethics

Ethics entails those values which have been adopted by individuals or rather instilled by the external forces that help one in distinguishing the right from what is wrong. Thus, such a person tends to act accordingly. Ethics originates from a number of sources which include religion, organizational culture, and legal obligations, among others. (Resource Management Institute, n.d.).

Ethics is one of the basic elements of human life. Ethics forms the base which people decide what course of action to take. It shapes an individual's plans and, therefore, without it, a person's actions would be random and aimless. This amounts to total confusion for a person as well as in organizations.

Organizations would lack ways of working towards their set goals. This is because bringing differences several goals is difficult.

Having an ethical standard is not a perfection, it can be a challenge for organizations to effectively work on their goals and successfully realizing them. The issue here is that, the degree of a rational ethical standard determines the extent to which an organization can organize its goals and actions in the right manner. This fosters the achievement of the most important values. Any shortcoming in ethics disable successful endeavors.

Ethics affects the way the society view actions. It dictates what is taken to be good and what is considered as bad, what is right or wrong. The society or even organization will take each and every action to ensure they work in accordance with the existing ethical standards. Any deviation from the accepted code of ethics amounts to a breach of ethical standards. There are always repercussions for this. The responsible person or organization is liable to a penalty.
