On Philology:

On Philology Jan M. Ziolkowski, 1990 As the Byzantinist Ihor ev _enko once observed Philology is constituting and interpreting the texts that have come down to us It is a narrow thing but without it nothing else is possible This definition accords with Saussure's succinct description of the mission of philology especially to correct interpret and comment upon the texts Philology is not just a grand etymological or lexicographical enterprise It also involves restoring to works as much of their original life and nuances as we can manage To read the written records of bygone civilizations correctly requires knowledge of cultural history in a broad sense of folklore legends laws and customs Philology also encompasses the forms in which texts express their messages and thus it includes stylistics metrics and similar studies On Philology brings together the papers delivered at a 1988 conference at Harvard University's Center for Literary and Cultural Studies The topic What is Philology drew an interdisciplinary audience whose main fields of research ran the gamut from ancient Indo European languages to African American literature signaling a certain sense of urgency about a seemingly narrow subject These papers reveal that the role of philology is more important than ever At a time when literature in printed form has taken a back seat to television film and music it is crucial that scholars be able to articulate why students and colleagues should care about the books with which they work Just as knowledge will be lost if philological standards decline so too will fields of study die if their representatives cannot find meaning for today's readers On Philology will be of interest not only to students of philology but also to anyone working in the fields of hermeneutics literature and communication

Give the Word: Responses to Werner Hamacher's "95 Theses on Philology" Werner Hamacher, 2019-06-19 Werner Hamacher's witty and elliptical 95 Theses on Philology challenges the humanities and particularly academic philology that assume language to be a given entity rather than an event In Give the Word eleven scholars of literature and philosophy Susan Bernstein Michèle Cohen Halimi Peter Fenves Sean Gurd Daniel Heller Roazen Jan Plug Gerhard Richter Avital Ronell Thomas Schestag Ann Smock and Vincent van Gerven Oei take up the challenge presented by Hamacher's theses At the close Hamacher responds to them in a spirited text that elaborates on the context of his 95 Theses and its rich theoretical and philosophical ramifications The 95 Theses included in this volume makes this collection a rich resource for the study and practice of radical philology Hamacher's philology interrupts and transforms parting with tradition precisely in order to remain faithful to its radical but increasingly occluded core The contributors test Hamacher's break with philology in a variety of ways attempting a philological practice that does not take language as an object of knowledge study or even love Thus in responding to Hamacher's Theses the authors approach language that because it can never be an object of any kind awakens an unfamiliar desire Taken together these essays problematize philological ontology in a movement toward radical reconceptualizations of labor action and historical time
