Studies *Art as experience of the living body / L'art comme experience du corps vivant* Christine Vial Kayser, 2024-01-23

This book analyses the dynamic relationship between art and subjective consciousness following a phenomenological pragmatist and enactive approach. It brings out a new approach to the role of the body in art not as a speculative object or symbolic material but as the living source of the imaginary. It contains theoretical contributions and case studies taken from various artistic practices: visual art, theatre, literature and music, Western and Eastern, the latter concerning China, India and Japan. These contributions allow us to nourish the debate on embodied cognition and aesthetics using theory, philosophy, art history, neuroscience and the authors' personal experience as artists or spectators. According to the Husserlian method of reduction and pragmatist introspection, they postulate that listening to bodily sensations, cramps, heartbeats, impulsive movements, eye orientation can unravel the thread of subconscious experience, both active and affective, that emerges in the encounter between a subject and an artwork, an encounter which, following John Dewey, we deem to be a case study for life in general. Ce livre analyse la relation dynamique entre l'art et la conscience subjective selon une approche phénoménologique pragmatiste et enactive. Il vise à faire merger une nouvelle approche du rôle du corps dans l'art, non pas comme objet spéculatif ou matériau symbolique, mais comme source vivante de l'imaginaire. Les contributions théoriques et les études de cas sont prises de diverses pratiques artistiques : arts visuels, théâtre, littérature et musique occidentales et orientales, ces dernières concernant la Chine, l'Inde et le Japon. Selon la méthode husserlienne de réduction et l'introspection pragmatiste, les textes témoignent que l'écoute des sensations corporelles, crampes, battements de cœur, mouvements pulsionnels, orientation des yeux, mises en jeu par l'œuvre, permet de dénouer le fil de l'expérience inconsciente, à la fois kinesthésique et affective, qui merge dans la rencontre entre un sujet et une œuvre d'art, une rencontre comprise à la manière de Dewey comme un cas d'école de la vie en général.

Jonsson, Mariona Portell, M. Teresa Anguera, José Luis Losada, Judith Schoonenboom, 2025-10-27. Having started as a small movement in the 1980s, the study of mixed methods research burst onto the scene around the beginning of the second millennium. After decades of intense dispute between supporters of the qualitative perspective and their quantitative counterparts, with both sides having grown deeply entrenched in their respective views, a complementary approach promising the possibility of integration had finally been proposed. By that time, however, the vast majority of researchers had committed to one stance or the other; very few of us argued that the two approaches could be complementary. Since then, the number of publications, scientific meetings and other activities devoted to the mixed methods approach has increased exponentially throughout the world. At a substantive level, we are pleased to see that a growing

number of fields are generating mixed methods research and we are eager to assist in promoting this trend But naturally the field has experienced some growing pains a certain degree of heterogeneity in terms of approaches differences of opinion regarding certain conceptualizations for example mixed methods vs multimethods numerous design taxonomies multiple ways of integrating qualitative and quantitative elements and various positions on how best to overcome the enduring lack of symmetry between qualitative and quantitative aspects The methodological and substantive spectrum is vast and broad possibly because the mixed methods approach has become obligatory for much research not only in psychology but in practically all branches of the social sciences
