**Reflections on Aesthetic Judgment and other Essays** Benjamin Tilghman, 2017-11-28 Benjamin Tilghman has been a leading commentator on analytic philosophy for many years. This book brings together his most significant and influential work on aesthetics. Spanning a period of thirty years and covering topics in aesthetics from literature to painting, the collection traces the development of Tilghman's two principal themes: a rejection of philosophical theory as a way of resolving problems about our understanding and appreciation of art, and the importance of the representation and presentation of the human and human concerns in art. Tilghman is profoundly influenced by the philosophy of Ludwig Wittgenstein, and his work is informed throughout by his conception and practice of philosophy. Written with exceptional clarity and with many references to original work in both painting and literature, this collection will be an invaluable resource not only for professional philosophers but for those working in the arts generally: art historians, critics, and literary theorists.

**Reflections on the Musical Mind** Jay Schulkin, 2013-07-28 What's so special about music? We experience it internally, yet at the same time it is highly social. Music engages our cognitive, affective, and sensory systems. We use music to communicate with one another and even with other species, the things that we cannot express through language. Music is both ancient and ever evolving. Without music, our world is missing something essential. In *Reflections on the Musical Mind*, Jay Schulkin offers a social and behavioral neuroscientific explanation of why music matters. His aim is not to provide a grand unifying theory. Instead, the book guides the reader through the relevant scientific evidence that links neuroscience, music, and meaning. Schulkin considers how music evolved in humans and birds, how music is experienced in relation to aesthetics and mathematics, the role of memory in musical expression, the role of music in child and social development, and the embodied experience of music through dance. He concludes with reflections on music and well-being. *Reflections on the Musical Mind* is a unique and valuable tour through the current research on the neuroscience of music.
