**The Impact of Bodily Experience on Paul's Resurrection Theology** Kai-Hsuan Chang,2021-09-23 Kai Hsuan Chang engages with the longstanding scholarly debate concerning the development of Paul's resurrection theology by investigating the correlation between his bodily experiences and his diverse articulations about resurrection. Drawing on insights from cognitive linguistics, Chang considers Paul's ideas about resurrection as fundamentally grounded in recurrent patterns of bodily experience, arguing that such experience of some religious activities in Paul's time (death rites, spirit possession, and baptism) contributed to the formation and development of his resurrection theology. Chang demonstrates that developments in Paul's ideas about bodily transformation at resurrection reflected in 1 Corinthians 15 resulted from a change in the experiential patterns on which his new idea is constructed rather than transformation during heavenly ascent as seen in Jewish traditions of resurrection. He thus applies cognitive linguistic tools to two considerations: first, whether Paul had contextual reasons to generate his innovation in 1 Corinthians 15; and second, whether Paul's innovation recurred or had continual effects in Christian groups. In so doing, Chang shows that Paul's innovation directly addressed a contextual issue of death rites in Corinth and exerted a continuing effect on Paul's later ideas of transformation, spirit possession, and baptism.

**Animism and the Question of Life** Istvan Praet,2013-08-15 The central purpose of this book is to help change the terms of the debate on animism, a classic theme in anthropology. It combines some of the finest ethnographic material currently available, including firsthand research on the Chachi of Ecuador with an unusually broad geographic scope: the Americas, Asia, and Africa. Edward B. Tylor originally defined animism as the first phase in the development of religion. The heyday of cultural evolutionism may be over, but his basic conception is commonly assumed to remain valid in at least one respect: there is still a broad consensus that everything is alive within animism, or at least that more things are alive than a modern scientific observer would allow for, e.g., clouds, rivers, mountains. It is considered self-evident that animism is based on a kind of exaggeration; its adherents are presumed to impute life to this, that, and the other in a remarkably generous manner. Against the prevailing consensus, this book argues that if animism has one outstanding feature, it is its peculiar restrictiveness. Animistic notions of life are astonishingly uniform across the globe, insofar as they are restricted rather than exaggerated. In the modern Western cosmology, life overlaps with the animate. Within animism, however, life is always conditional and therefore tends to be limited to one's kin, one's pets, and perhaps the plants in one's garden. Thus it emerges that our modern biological concept of life is stranger than generally thought.

**Research in Ritual Studies** Ronald L. Grimes, 1985 *Kaṭṭaikkūttu* Hanne M. de Bruin, 1999 This book gives an insight into Ka aikk ttu a living Tamil theatre tradition. Taking the perspective of performers as a starting point it analyses how this theatre tradition has been able to adjust itself to changing conditions and challenges because of its inherent flexibility. The phenomenon of flexibility pervades both the formation and internal arrangements of theatre companies and the actual performances themselves. The first part of the book focuses on Ka aikk ttu in its historical and social context. It traces the theatre's disengagement from its organic embedding in the social and ritual village organization and its transition towards a more autonomous and more professional regional theatre form during the last fifty to hundred years. This transformation was accompanied by processes of professionalization and commercialization which had their impact on the practitioners and the performances. The second part of the book provides a detailed analysis of the working of oral Ka aikk ttu texts in performance. Through a flexible handling of the oral verbal and musical material within the boundaries of a relatively fixed framework underlying these texts Ka aikk ttu performers try to fulfill to the best of their abilities the demands of sponsors, audiences and occasions

**Studies and Texts**, 1955 **Rituals in Abundance** Gerard Lukken, 2005 Rituals are closely linked with culture. This book is a consideration of Christian ritual in our culture. It was originally written particularly with an eye to the ritual developments in The Netherlands which can be considered as representative for our Western European culture. It has been revised and expanded for the English edition. As in other European countries in the 1960s Dutch society witnessed a serious crisis in ritual. The situation was paradoxical. While under the influence of the Second Vatican Council and the Liturgical Movement in the Catholic churches there was a great creativity with regard to ritual, ritual was gradually disappearing from the society at large and participation in Christian ritual was rapidly draining away. A religious void arose. However, since then the situation has changed fundamentally. Rituals were rediscovered in the 1990s indeed to such an extent that one can now speak of rituals in abundance. In this book the author sketches out the directions and sets out signposts for where ritual is going in contemporary culture. He traces the peculiar characteristics of ritual, indicates what shifts have taken

place and tries to further define the identity of various rituals In doing this he concentrates on the question of the place of Christian ritual in our culture How is Christian ritual connected with the many rites in our culture What new shape is it taking on in our culture In the midst of the other rites what is the peculiar identity of Christian ritual In this book the accent is on the anthropological approach to Christian ritual it works from the bottom up The book seeks answers to the questions being asked in the discipline of ritual studies which particularly since the second half of the 1980s has arisen as an important realm or stage on which different disciplines studying ritual come together **New Methods for Old-Age Research** Christine L. Fry, 1986-03-30 This is the first book in anthropology to provide strategies for the collection of qualitative and comparative data about aging representing state of the art techniques including cross cultural and life cycle studies of aging Covering ethnic communities in the United States as well as other countries this book is an indispensable resource and critical guide to research methods for professionals and students of gerontology anthropology and the social sciences in general **Practice of the Court of Referees on Private Bills in Parliament** Great Britain.
