## On Social Evolution:

On Social Evolution Shiping Tang, 2020-02-26 Tang provides a coherent and systematic exploration of social evolution as a phenomenon and as a paradigm. He critically builds on existing discussions on social evolution while drawing from a wide range of disciplines including archaeology, evolutionary anthropology, sociology, economics, political science, the philosophy of social sciences, and evolutionary biology. Clarifying the relationship between biological evolution and social evolution, Tang lays bare the ontological and epistemological principles of the social evolutionary paradigm. He also presents operational principles and tools for deploying this paradigm to understand empirical puzzles about human society. This is a vital resource for students, practitioners, and philosophers of all social sciences. **Social Evolution** Benjamin Kidd, 1906 Social Evolution and Political Theory Leonard Trelawny Hobhouse, 1911 **Deep History** David Laibman, 2008-01-03 Does history have a direction? Are there principles that unify our experience and show connections among diverse places, times, and cultures? Seeking to answer these questions, Deep History offers a fresh theory of social evolution while thinking grandly about the human condition. With his theory based in the Marxian and historical materialist tradition, David Laibman starts from scratch and utilizes some of the best insights in economics and economic history, sociology, political science, anthropology, history, and philosophy to construct a new framework for understanding the most general aspects of social evolution. He then applies this framework to modern era capitalist societies and projecting it on a postcapitalist or socialist future captures an understanding of the core momentum that has characterized our lived experience: a momentum considerate of diversity, contingency, and the role of human consciousness over time. *The Philosophy of Social Evolution* Jonathan Birch, 2017 From mitochondria to meerkats, the natural world is full of spectacular examples of social behaviour. Jonathan Birch explores how the three key explanatory ideas of social evolution theory: Hamilton's rule, kin selection, and inclusive fitness, can illuminate our understanding of the social world. **Social Evolution** Kidd, 1895 The Laws of Social Evolution Franklin Monroe Sprague, 1895 **The Principles of Social Evolution** Christopher Robert Hallpike, 1986 Dispelling the general assumption that social institutions survive because of their sophisticated adaptive advantages, this ground-breaking work asserts that the commonest customs and institutions may endure because of their very simplicity or as a result of simple human proclivity. Using religious, military, and kinship institutions to illustrate this argument, the author shows that a precise combination of these factors may lead to the emergence of new forms of social evolution. *The Eighth Day* Richard Newbold Adams, 1988-03-01 Can human social evolution be described in terms common to other sciences, most specifically as an energy process? The Eighth Day reflects a conviction that the human trajectory, for all its uniqueness and indeterminism, will never be satisfactorily understood until it is framed in dynamics that are common to all of nature. The problem in doing this, however, lies in ourselves. The major social theories have failed to treat human social evolution as a component of broader natural processes. The Eighth Day argues that the energy process provides a basis for explaining

comparing and measuring complex social evolution Using traditional ecological energy flow studies as background society is conceived as a self organization of energy This perspective enables Adams to analyze society in term of the natural selection of self organizing energy forms and the trigger processes basic to it Domestication civilization socioeconomic development and the regulation of contemporary industrial nation states serve to illustrate the approach A principal aim is to explore the limitation that energy process imposes on human social evolution as well as to clarify the alternatives that it allows Richly informed by contemporary anthropological historicism sociobiology and Marxism The Eighth Day avoids simple reductionism and denies facile ideological categorization Adams builds on work in nonequilibrium thermodynamics and theoretical biology and brings three decades of his own work to an analysis of human society that demands an extreme materialism in which human thought and action find a central place *Principles of Social Evolution* Andrew F.G. Bourke,2011-01-06 Investigates and sets out the common principles of social evolution operating across all taxa and levels of biological organisation **An Introduction to the Study of Social Evolution** Francis Stuart Chapin,1913 **The Ephemeral Civilization** Graeme Snooks,2002-09-11 The Ephemeral Civilization is an astonishing intellectual feat in which Graeme Snooks develops an original and ground breaking analysis of changing sociopolitical forms over the past 3 000 years Snooks challenges the prevailing theories of social evolutionism with an innovative approach which also looks ahead to the twenty first century The Ephemeral Civilization builds on the model of dynamic strategy outlined in the author s highly acclaimed companion volume The Dynamic Society The Ephemeral Society is divided into three parts theory history and future The Function of Socialization in Social Evolution Ernest Watson Burgess,1916 *Darwinian Social Evolution and Social Change* William Kerr,2021-07-29 This book introduces the value of a Darwinian social evolutionary approach to understanding social change The chapters discuss several different perspectives on social evolutionary theory and go on to link these with comparative and historical sociological theory and two case studies Kerr brings together social change theory and theories on nationalism whilst also providing concrete examples of the theories at work The book offers a vision of rapprochement between these different areas of theory and study and to where this could lead future studies of comparative history and sociology As such it should be useful to scholars and students of nationalism and social change sociologists political scientist and historians

**Mathematical Models of Social Evolution** Richard McElreath,Robert Boyd,2007-03-15 Over the last several decades mathematical models have become central to the study of social evolution both in biology and the social sciences But students in these disciplines often seriously lack the tools to understand them A primer on behavioral modeling that includes both mathematics and evolutionary theory Mathematical Models of Social Evolution aims to make the student and professional researcher in biology and the social sciences fully conversant in the language of the field Teaching biological concepts from which models can be developed Richard McElreath and Robert Boyd introduce readers to many of the typical mathematical tools that are used to analyze evolutionary models and end each chapter with a set of problems that draw upon these techniques Mathematical Models of Social Evolution equips behaviorists and evolutionary biologists with the mathematical knowledge to truly understand the models on which their research depends Ultimately McElreath and Boyd s goal is to impart the fundamental concepts that underlie modern biological understandings of the evolution of behavior so that readers will be able to more fully appreciate journal articles and scientific literature and start building models of their own

Foundations of Social Evolution Steven A. Frank,1998-07-21 He unites these with the best of economic thought a clear theory of model formation and comparative statics the development of simple methods for analyzing complex problems and notions of information and rationality Using this unique multidisciplinary approach Frank makes major advances in understanding the foundations of social evolution

**Social Evolutionism** Stephen K. Sanderson,1992 In Social Evolutionism Stephen Sanderson provide a lucid account of a body of theory that has profoundly affected both intellectual and popular assumptions about human nature society and behavior He describes the prominent and controversial role that evolutionary ideas have played in the development of social theory He demonstrates the diversity of evolutionary ideas by comparing their notions of causation their assumptions about human progress and the adequacy of their modes of explanation and interpretation of evidence Although he is highly critical of some aspects of evolutionary thinking and some modes of evolutionism Professor Sanderson shows that an evolutionary interpretation of world history contributes vital insights about the character of human social life

*On Social Evolution* Herbert Spencer,1972 *Human Institutions* Jonathan H. Turner,2003 In recent years the New Institutionalism has focused more on organizations in their social and cultural environments than on societal level institutional systems Thus missing from these studies has been a larger sociological analysis of institutions per se In his newest book leading social theorist Jonathan H Turner offers a creative richly grounded reinterpretation of social evolution He resurrects a level of analysis undertaken by earlier functionalist theorists but with a new found emphasis that of discovering the larger forces driving the formation of human institutional

systems Only by exploring the larger macro dynamics can the institutions of economy kinship religion polity law and education be fully understood as Turner persuasively shows in this magisterial explication of twenty millenia of human social life
