Machine Learning and Data Science for Business Optimization: A Practical Guide for Data-Driven Decision Making
Sushira Somavarapu Om Goel,2025-01-15 Machine Learning and Data Science for Business Optimization A Practical Guide for Data Driven Decision Making Artificial Intelligence in the Production of Biotherapeutics Alok Kumar Srivastav,Priyanka Das,2025-08-29 The transformative role of artificial intelligence AI in modern biomanufacturing focuses on key areas such as process analytical technology PAT Good Manufacturing Practice GMP compliance predictive analytics and AI driven quality systems It bridges cutting edge AI applications with the complexities of biotherapeutic production offering insights into automation real time monitoring and process optimization Delving into the core of biomanufacturing the book provides a structured journey through its critical phases It begins with an introduction to modern biomanufacturing principles quality by design approaches and the integration of AI Subsequent chapters examine raw material management lean manufacturing practices and the application of predictive analytics to optimize supply chains Readers will explore advanced tools such as AI enhanced data acquisition in PAT automated standard operating procedures SOPs and AI driven process controls for fermenters and chromatography systems The text also addresses GMP essentials including personnel management hygienic facility design and pharmaceutical water systems Key chapters highlight AI's role in validation processes sterile packaging and regulatory compliance referencing global guidelines from organizations such as the WHO

FDA and ICH Real world case studies featuring therapeutic proteins monoclonal antibodies and vaccines underscore the practical applications of AI in scaling and maintaining biotherapeutic production This book equips readers with a comprehensive understanding of AI s potential to enhance efficiency accuracy and compliance in biomanufacturing Whether you are a professional researcher or student this guide offers actionable insights into leveraging AI to revolutionize biotherapeutic production while adhering to the highest industry standards What You Will Learn Understand how AI enhances every phase of biotherapeutic production from raw material management to regulatory compliance optimizing efficiency accuracy and quality Explore the role of AI in advanced data acquisition process control and continuous improvement including applications in fermenters flow filtration and chromatography systems Gain insights into leveraging AI for automating standard operating procedures SOPs predictive maintenance quality assurance and adhering to global GMP standards like WHO and FDA guidelines Learn how AI transforms upstream and downstream processes ensures sterility in packaging and supports case studies on therapeutic proteins monoclonal antibodies and human vaccines Discover the potential of AI in shaping the future of biomanufacturing including challenges data security and the ethical implications of AI driven automation

Using Traditional Design Methods to Enhance AI-Driven Decision Making Nguyen, Tien V. T., Vo, Nhut T. M., 2024-01-10 In the rapidly evolving landscape of industrial activities artificial intelligence AI has emerged as a powerful force driving transformative change Among its many applications AI has proven to be instrumental in reducing processing costs associated with optimization challenges The intersection of AI with optimization and multi criteria decision making MCDM techniques has led to practical solutions in diverse fields such as manufacturing transportation finance economics and artificial intelligence Using Traditional Design Methods to Enhance AI Driven Decision Making delves into a wide array of topics related to optimization decision making and their applications Drawing on foundational contributions system developments and innovative techniques the book explores the synergy between traditional design methods and AI driven decision making approaches The book is ideal for higher education faculty and administrators students of higher education librarians researchers graduate students and academicians Contributors are invited to explore a wide range of topics including the role of AI driven decision making in leadership trends in AI driven decision making in Industry 5.0 applications in various industries such as manufacturing transportation healthcare and banking services as well as AI driven optimization in mechanical engineering and materials

Food Product Optimization for Quality and Safety Control Juan Carlos Contreras-Esquivel, Laxmikant S. Badwaik, Porteen Kannan, A. K. Hagh, 2020-11-25 This new book discusses food quality and safety standards that are critically important for both developed and developing economies where consumer safety is among the primary issues to be considered in food supply chain management The editors consider that food safety is a multi faceted subject using microbiology chemistry standards and regulations and risk management to address issues involving bacterial pathogens chemical contaminants natural toxicants additive safety allergens and more hence the volume emphasizes the

interrelationship between these areas and their equal importance in food production. With chapters from researchers from around the world this book looks at critically important advances and topics in technology that has become indispensable in controlling hazards in the modern food industry. The varied topics include the role of mineral content of soils in food safety, microwaveassisted extraction of phenolic compounds, foodborne pathogenic anaerobes, enzymatic modification of ferulic acid content and more. *SIAM Journal on Control and Optimization* Society for Industrial and Applied Mathematics, 1976

Machine Tool Reliability Bhupesh K. Lad, Divya Shrivastava, Makarand S. Kulkarni, 2016-02-19 This book explores the domain of reliability engineering in the context of machine tools. Failures of machine tools not only jeopardize users ability to meet their due date commitments but also lead to poor quality of products, slower production, down time losses etc. Poor reliability and improper maintenance of a machine tool greatly increases the life cycle cost to the user. Thus the application area of the present book i.e. machine tools will be equally appealing to machine tool designers, production engineers and maintenance managers. The book will serve as a consolidated volume on various dimensions of machine tool reliability and its implications from manufacturers and users point of view. From the manufacturers point of view it discusses various approaches for reliability and maintenance based design of machine tools. In specific it discusses simultaneous selection of optimal reliability configuration and maintenance schedules, maintenance optimization under various maintenance scenarios and cost based FMEA. From the users point of view it explores the role of machine tool reliability in shop floor level decision making. In specific it shows how to model the interactions of machine tool reliability with production scheduling, maintenance scheduling and process quality control.
