**Optometric Management of Learning-related Vision Problems** Mitchell Scheiman, Michael W. Rouse, 2006-01-01

This book explores the relationship between vision and learning and the role of optometrists in the assessment and management of learning related vision problems. It discusses normal child development, the learning process, learning disabilities, the relationship between vision and learning, and models for managing vision problems affecting learning. It is also of interest to health care practitioners involved in the evaluation and treatment of children and adults with learning difficulties. Instructor resources are available; please contact your Elsevier sales representative for details. Presents an organized, easy-to-follow approach to the diagnosis and treatment of learning related vision problems. Each chapter contains key terms and chapter review questions, making it more appealing to the student and instructor. Includes appendices containing sample reports, sample questionnaires, sample letters, a bibliography, and case histories showing the reader how to use the material from the book in practice. Well-respected authors and contributors provide authoritative coverage of the topic. Expanded information on the use of colored lenses and reading. New chapter on reading disorders that covers how children learn to read, teaching methods, optometric assessment, and management of dyslexia. Chapters have been updated with new computer software options, including computer-aided vision therapy, perceptual home therapy system, and temporal visual processing program. Updated testing battery including new tests: visual processing speed and optometric use of IQ screening tests such as K-BIT. Expanded coverage of psycho-education. Evaluation includes substantial updates with new test instruments such as WISC. Substantial revisions based on literature review for last 10 years. New and updated illustrations.

*Optometric Management of Learning Related Vision Disorders* Mitchell Scheiman, 1994      *Visual Diagnosis and Care of the Patient with Special Needs* Taub, Mary Bartuccio, Dominick M. Maino, 2012. *Visual Diagnosis and Care of the Patient with Special Needs* provides a thorough review of the eye and vision care needs of patients with special needs. This book gives you a better understanding of the most frequently encountered developmental and acquired disabilities seen in the eye care practitioner's office. These disabilities include patients with autism, brain injury, Fragile X syndrome, and Down syndrome, as well as those with psychiatric illness, dual diagnosis, and more. The text discusses in great detail the visual issues inherent in these populations and their possible treatment. A group of authors with approximately 500 years of experience in the field of eye care and special populations have been brought together to develop this comprehensive reference. It may appear that this book is written primarily for eye care practitioners such as optometrists and ophthalmologists, while vision is the overriding topic; this book serves as an excellent resource for a multitude of professions, including those engaged in occupational therapy, physical therapy, speech and language therapy, psychiatry, social work, pediatric medicine, and special education.      **Clinical Management of Binocular Vision** Mitchell Scheiman, Bruce Wick, 2008.
